LAB-ANIMAL RESEARCH EQUIPMENT

VO₂/VCO₂/Resp. Rate

"Oxymax-85" metabolic computer

Open circuit "indirect calorimetry" method. Continuous measurement over 24 hrs. Totally computerized complete system for 1 to 4 animal cages, utilizes IBM-PC computer. High accuracy: 1%. Continuous airflow system. Also can measure relative tidal volume. Prints STP values in periodic intervals.

Will work in the system with:
LAB-ANIMAL EXERCISER
exercises 1 to 4 animals
FOR METABOLICAL, TOXICOLOGICAL & NUTRITIONAL STUDIES
Equipped with shock grids, speed programmer and results printer.

COMPUTERIZED PRINTING COUNTER 8 TO 128 INPUTS

for
Apple IIe
or
IBM-PC

Columbus Instruments Counter Interface for Apple IIe and IBM-PC personal computers allows multi-channel counting of events, printing subtotals and totals in user selectable intervals as well as storage of data on floppy disk for further data analysis.

TAIL-FLICK APPARATUS FOR ANALGESIA Studies in Mice and Rats

★★ VIDEOMEX-3 ★★

MOVING IMAGE ANALYZER

MEASURES MOTION (ACTIVITY)

OF MULTIPLE ANIMALS

AND "SOCIAL CONTACT"

and

CAN BE USED FOR:
• RODENTS
• FISH
• INSECTS →
• CATTLE
• HUMANS
• MICROSCOPIC OBJECTS

CONVULSION METER

uses precision load cell

Convulsion Meter makes possible objective and quantitative measurement of animal convulsions. A precision platform load cell is used as a sensor to convert the vertical components of convulsion force into proportional electrical signals. The same platform can be used for both rats and mice, with maximum measurable force of 5Kg.

ANIMAL FEEDING MONITOR measures consumption in grams

Feed-Scale feeding monitor directly measures true food consumption in grams utilizing precise electronic scales interfaced to the Apple IIe or IBM-PC/XT personal computer. One to sixteen feeders can be connected to the unit's interface, facilitating a variety of experiment designs, e.g., four animal cages each with a selection of four animal diets. Accuracy of 1/10 gram is sufficient for application to both rats and mice. Larger range sensors (3000 grams) are available for larger animals. Their accuracy is 1 gram. Results can be printed, stored on disk, or both. Software is menu driven.

CARDIAC OUTPUT COMPUTER + IBM-PC/XT FOR HUMANS AND RATS

Calculates displays, stores on the disc, dilution Curve, B.P., and ECG waveforms plus 15 other parameters of circulatory system. Helps calculate Ejection Fraction. Can be used as Vital Parameters data logger. Comes with all software.

COMPUTERIZED ANIMAL ACTIVITY MONITORS

Interface with IBM-PC/XT or Apple IIe.

system of 1 to 8 animal cages model: "Auto-Track"/IBM

separates ambulatory from stereotypic activity, counts clockwise and counter-clockwise rotations, measures rearings, monitors and times animal location in the cage and more ...

NEW! Computerized body temperature radio telemetry

Quarterly journal devoted
entirely to in-depth review articles

PHARMACOLOGICAL REVIEWS

Editor: **James A. Bain, PhD**, Emory University, Atlanta, Georgia

PHARMACOLOGICAL REVIEWS is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. Recent major reviews include:

The Parasympathetic Neuroeffector Junction of the Heart, by Konrad Loffelholz and Achilles J. Pappano

N-Acetylation Pharmacogenetics, by Wendell W. Weber and David W. Hein

The Biophysical Pharmacology of Calcium-Dependent Acetylcholine Secretion, by Eugene M. Silinsky

Aging and Drug Disposition: An Update, by Douglas L. Schmucker

Pharmacological Aspects of the Chewing of Khat Leaves, by Peter Kalix and Olav Braendén

Presynaptic, Ganglionic, and Gastrointestinal Dopamine Receptors in the Periphery, by J. L. Williams, W. A. Buylaelert, R. A. Lefebvre, & M. G. Bogaert

Bromocriptine in Parkinson's Disease, by A. N. Lieberman and M. Goldstein

Cellular Effects of Cannabis, by Billy R. Martin and Louis S. Harris

Neurotransmitter Regulation of Anterior Pituitary Hormones, by Jouko Töumi and P. Mannisto

Norepinephrine and the Antibody Response, by Virginia Sanders and Albert Munson

Behavioral Toxicology, by D. C. McMillan and Galen Wenger

PHARMACOLOGICAL REVIEWS continues to publish the important, longer papers of interest to pharmacologists, physiologists, toxicologists, and biological chemists. No library serving the pharmacologist should be without a subscription.

Leading Pharmacology Journals

Publications of the American Society for Pharmacology and Experimental Therapeutics, Inc.

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

Editor: Eva King Killam, PhD

JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology, as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. **Monthly**

DRUG METABOLISM AND DISPOSITION

The Biological Fate of Chemicals

Editor: Vincent G. Zannoni, PhD

DRUG METABOLISM AND DISPOSITION publishes *in vitro* and *in vivo* experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. The areas covered are • pharmacokinetics, pharmacodynamics, and mechanisms • genetic, nutritional, or hormonal factors affecting the biological fate of chemicals • toxicological consequences of xenobiotic metabolism. **Bimonthly**

PHARMACOLOGICAL REVIEWS

Editor: James A. Bain, PhD

PHARMACOLOGICAL REVIEWS is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. No library serving the pharmacologic community should be without a subscription. **Quarterly**

MOLECULAR PHARMACOLOGY

Editor: William A. Catterall, PhD

The papers published in **MOLECULAR PHARMACOLOGY** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. **Monthly**

Order free by phone. Call 1-800-638-6423 from anywhere in the U.S. except AK and HI. MD residents, call 528-4105 collect.
