

INDEX TO VOLUME XXV

Abel, John J., and Geiling, E. M. K. Researches on insulin. I. Is insulin an unstable sulphur compound?.....	423
Absorption and excretion of the anthelmintic dose of carbon tetrachloride, A quantitative study of the.....	235
Acid, malic, and its salts, The pharmacological behavior of.....	467
Acids, dicarboxylic, The nephropathic action of the, and their derivatives. 59, 65	
Action of alcohol on the circulation, The.....	289
— of quinine on protein metabolism, respiratory exchange and heat function, The.....	175
Acute histamine intoxication, Blood chemistry in.....	381
Administration of desiccated red bone marrow and spleen, The effect of the, on the resistance of erythrocytes to hypotonic saline solutions in dogs..	357
Adsorbed substances, The liberation of, from proteins. A function of the bile salts.....	449
Alcohol, The action of, on the circulation.....	289
American Society for Pharmacology and Experimental Therapeutics, Scientific proceedings of the.....	137
Animals, On the specificity of the so-called arsenic receptor in the higher..	297
—, Urinary excretion of tartrates following administration to.....	459
Anthelmintic dose of carbon tetrachloride, A quantitative study of the absorption and excretion of the.....	235
Antipyretic drugs, The mechanism of the action of.....	309
Arsenic atoms, four, The chemo-therapeutic properties of a substance with a chain of.....	53
— receptor in the higher animals, On the specificity of the so-called.....	297
Arsonium, stibonium, phosphonium and sulfonium compounds, On some effects of, on the autonomic nervous system.....	315
Atoms, four arsenic, The chemo-therapeutic properties of a substance with a chain of.....	53
Autonomic nervous system, On some effects of arsonium, stibonium, phosphonium and sulfonium compounds on the.....	315
Barbour, H. G., Ridout, G. B., and Claydon, D. The chemo-therapeutic properties of a substance with a chain of four arsenic atoms.....	53
Baskett, Roy F., and Gruber, Charles M. I. The effect of phenobarbital (luminal) and sodium phenobarbital (luminal-sodium) upon blood pressure and respiration.....	219
Behavior, The pharmacological, of malic acid and its salts.....	467
Beutner, R. The binding power of serum for drugs tested by a new in vitro method.....	365

- Bile salts, A function of the. The liberation of adsorbed substances from proteins..... 449
- Binding power of serum for drugs tested by a new in vitro method, The.... 365
- Blood chemistry in acute histamine intoxication..... 381
- oxygen binding capacity (hemoglobin concentration), Potassium chlorate: Its influence on the, its rate of excretion and quantities found in the blood after feeding..... 47
- , Potassium chlorate: Its rate of excretion and quantities found in the, after feeding, its influence on the blood oxygen binding capacity (hemoglobin concentration)..... 47
- pressure and respiration, The effect of phenobarbital (luminal) and sodium phenobarbital (luminal-sodium) upon..... 219
- Bone marrow, desiccated red, and spleen, The effect of the administration of, on the resistance of erythrocytes to hypotonic saline solutions in dogs..... 357
- Brown, E. D., ed. Scientific proceedings of the American Society for Pharmacology and Experimental Therapeutics..... 137
- Calcium and potassium, The influence of, on the response of the isolated frog heart to epinephrin..... 75
- Carbon tetrachloride, A quantitative study of the absorption and excretion of the anthelmintic dose of..... 235
- Chemistry, Blood, in acute histamine intoxication..... 381
- Chemo-therapeutic properties of a substance with a chain of four arsenic atoms, The..... 53
- Chlorate, Potassium: Its influence on the blood oxygen binding capacity (hemoglobin concentration), its rate of excretion and quantities found in the blood after feeding..... 47
- Circulation, The action of alcohol on the..... 289
- Claydon, D., Barbour, H. G., and Ridout, G. B. The chemo-therapeutic properties of a substance with a chain of four arsenic atoms..... 53
- Compound, sulphur, Is insulin an unstable? Researches on insulin. I.... 423
- Compounds, On some effects of arsonium, stibonium, phosphonium and sulfonium, on the autonomic nervous system..... 315
- Cori, Carl F. Insulin and liver glycogen..... 1
- Corley, Ralph C., Rose, William C., Weber, Clarence J., and Jackson, Richard W. The nephropathic action of the dicarboxylic acids and their derivatives. III. Acids of six to nine carbons..... 59
- Davidson, Bessie M. Studies of intoxication. I. The action of nitrous oxide..... 91
- Studies of intoxication. II. The action of acetylene..... 119
- Desiccated red bone marrow and spleen, The effect of the administration of, on the resistance of erythrocytes to hypotonic saline solutions in dogs..... 357
- Dicarboxylic acids and their derivatives, The nephropathic action of the. 59, 65
- Dimmitt, Pauline S., and Rose, William C. The nephropathic action of the dicarboxylic acids and their derivatives. IV. Mucic acid..... 65

Dogs, resistance of erythrocytes to hypotonic saline solutions in, The effect of the administration of desiccated red bone marrow and spleen on the.....	357
Dosage to effect, The relation of.....	275
Dose, anthelmintic, of carbon tetrachloride, A quantitative study of the absorption and excretion of the.....	235
Drugs, antipyretic, The mechanism of the action of.....	309
— tested by a new in vitro method, The binding power of serum for.....	365
Dyer, Helen A., Voegtlin, Carl, and Leonard, C. S. On the specificity of the so-called arsenic receptor in the higher animals.....	297
Effect of iodides on the human nitrogen metabolism, Further studies on the.....	411
— of phenobarbital (luminal) and sodium phenobarbital (luminal-sodium) upon blood pressure and respiration, The.....	219
— of the administration of desiccated red bone marrow and spleen on the resistance of erythrocytes to hypotonic saline solutions in dogs, The.....	357
—, The relation of dosage to.....	275
Epinephrin, The influence of calcium and potassium on the response of the isolated frog heart to.....	75
Erythrocytes, resistance of to hypotonic saline solutions in dogs, The effect of the administration of desiccated red bone marrow and spleen on the.....	357
Excretion and absorption of the anthelmintic dose of carbon tetrachloride, A quantitative study of the.....	235
— and quantities found in the blood after feeding, Potassium chlorate: Its rate of, its influence on the blood oxygen binding capacity (hemoglobin concentration).....	47
—, Urinary, of tartrates following administration to animals.....	459
Experimental Therapeutics, Pharmacology and, Scientific Proceedings of the American Society for.....	137
Four arsenic atoms, The chemo-therapeutic properties of a substance with a chain of.....	53
Frog heart, The influence of calcium and potassium on the response of the isolated, to epinephrin.....	75
Function of the bile salts, A. The liberation of adsorbed substances from proteins.....	449
Further studies on the effect of iodides on the human nitrogen metabolism.....	411
Geiling, E. M. K., and Abel, John J. Researches on insulin. I. Is insulin an unstable sulphur compound?.....	423
Githens, Thomas Stotesbury. The mechanism of the action of antipyretic drugs.....	309
Glycogen, liver, Insulin and.....	1
Grabfield, G. P., and Prentiss, A. M. Further studies on the effect of iodides on the human nitrogen metabolism.....	411
Gruber, Charles M., and Baskett, Roy F. I. The effect of phenobarbital (luminal) and sodium phenobarbital (luminal-sodium) upon blood pressure and respiration.....	219

- Guy, Emmett F., and Leake, Chauncey D. The effect of the administration of desiccated red bone marrow and spleen on the resistance of erythrocytes to hypotonic saline solutions in dogs..... 357
- Hardikar, S. W. The action of quinine on protein metabolism, respiratory exchange and heat function. II. Respiratory exchange and heat function..... 175
- Hashimoto, Hirotohi. Blood chemistry in acute histamine intoxication.. 381
- Heart, frog, The influence of calcium and potassium on the response of the isolated, to epinephrin..... 75
- Heat function, The action of quinine on protein metabolism, respiratory exchange and..... 175
- Heathcote, Reginald St. A. The pharmacological action of cryptopine... 35
- Hemoglobin concentration (blood oxygen binding capacity), Potassium chlorate: Its influence on the, its rate of excretion and quantities found in the blood after feeding..... 47
- Histamine intoxication, acute, Blood chemistry in..... 381
- Human nitrogen metabolism, Further studies on the effect of iodides on the. 411
- Hunt, Reid, and Renshaw, R. R. On some effects of arsonium, stibonium, phosphonium and sulfonium compounds on the autonomic nervous system..... 315
- Hypotonic saline solutions in dogs, The effect of the administration of desiccated red bone marrow and spleen on the resistance of erythrocytes to..... 357
- Influence of calcium and potassium on the response of the isolated frog heart to epinephrin, The..... 75
- Insulin and liver glycogen..... 1
- , Researches on. I. Is insulin an unstable sulphur compound?..... 423
- Intoxication, acute histamine, Blood chemistry in..... 381
- , Studies of..... 91
- , Studies of..... 119
- In vitro method, new, The binding power of serum for drugs tested by a... 365
- Iodides, Further studies on the effect of, on the human nitrogen metabolism. 411
- Jackson, Richard W., Rose, William C., Weber, Clarence J., and Corley, Ralph C. The nephropathic action of the dicarboxylic acids and their derivatives. III. Acids of six to nine carbons..... 59
- Johnston, Robert L., Salant, William, and Washeim, Henry, Jr. The influence of calcium and potassium on the response of the isolated frog heart to epinephrin..... 75
- Leake, Chauncey D., and Guy, Emmett F. The effect of the administration of desiccated red bone marrow and spleen on the resistance of erythrocytes to hypotonic saline solutions in dogs..... 357
- Leonard, C. S., Voegtlin, Carl, and Dyer, Helen A. On the specificity of the so-called arsenic receptor in the higher animals..... 297

Liberation of adsorbed substances from proteins, The. A function of the bile salts.....	449
Liver glycogen, Insulin and.....	1
Luminal (phenobarbital) and sodium phenobarbital (luminal-sodium) upon blood pressure and respiration, The effect of.....	219
— sodium (sodium phenobarbital), The effect of phenobarbital (luminal) and, upon blood pressure and respiration.....	219
McDowall, R. J. S. The action of alcohol on the circulation.....	289
Malic acid and its salts, The pharmacological behavior of.....	467
Marrow, desiccated red bone, and spleen, The effect of the administration of, on the resistance of erythrocytes to hypotonic saline solutions in dogs.....	357
Mechanism of the action of antipyretic drugs, The.....	309
Metabolism, human nitrogen, Further studies on the effect of iodides on the. —, protein, respiratory exchange and heat function, The action of quinine on.....	411
Method, new in vitro, The binding power of serum for drugs tested by a..	365
Nephropathic action of the dicarboxylic acids and their derivatives, The..	59, 65
Nervous system, autonomic, On some effects of arsonium, stibonium, phosphonium and sulfonium compounds on the.....	315
Nitrogen metabolism, human, Further studies on the effect of iodides on the.....	411
On some effects of arsonium, stibonium, phosphonium and sulfonium compounds on the autonomic nervous system.....	315
On the specificity of the so-called arsenic receptor in the higher animals..	297
Oxygen binding capacity, blood (hemoglobin concentration), Potassium chlorate: Its influence on the, its rate of excretion and quantities found in the blood after feeding.....	47
Pack, George T., and Underhill, Frank P. The pharmacological behavior of malic acid and its salts.....	467
Pharmacological action of cryptopine, The.....	35
— behavior of malic acid and its salts, The.....	467
Pharmacology and Experimental Therapeutics, Scientific Proceedings of the American Society for.....	137
Phenobarbital (luminal) and sodium phenobarbital (luminal-sodium) upon blood pressure and respiration, The effect of.....	219
Phosphonium, sulfonium, arsonium and stibonium compounds, On some effects of, on the autonomic nervous system.....	315
Potassium chlorate: Its influence on the blood oxygen binding capacity (hemoglobin concentration), its rate of excretion and quantities found in the blood after feeding.....	47
—, The influence of calcium and, on the response of the isolated frog heart to epinephrin.....	75
Power. The binding, of serum for drugs tested by a new in vitro method..	365

- Prentiss, A. M., and Grabfield, G. P. Further studies on the effect of iodides on the human nitrogen metabolism..... 411
- Proceedings, Scientific, of the American Society for Pharmacology and Experimental Therapeutics..... 137
- Pituitrin hyperglycaemia and the antagonism between pituitrin and insulin. Carl Voegtlin, J. W. Thompson, and E. R. Dunn..... 137
- Effect of d. and l. suprarenin, pituitrin and pilocarpin on the mineral balance of the lymph. William F. Petersen and T. P. Hughes.... 137
- Standardization of thyroid. Reid Hunt..... 138
- Some quantitative relationships of thyroxin calculated from its calorogenic action. Walter M. Boothby and Edward J. Baldes..... 139
- The excretion of morphin by the gastric mucosa. Robert A. Hatcher.. 139
- A preliminary note on the effect of certain alcoholic beverages on the kidney and liver. William de B. MacNider..... 140
- The response of the small intestine of *Rana pipiens* to autonomic poisons. George B. Roth..... 141
- Magnesium sulphate on the peristalsis and propulsion of excised small intestines. Torald Sollmann and Adelin Rademaekers..... 142
- The excretion of mercurochrome in the bile. Philip S. Hench, Albert M. Snell, and Carl H. Greene..... 142
- Alkalies in methyl alcohol poisoning. Worth Hale and Robert Ganz.. 144
- The toxicity of impurities in wood alcohol. I. Allyl alcohol. H. V. Atkinson..... 144
- "Further studies upon effects of impurities in ether used for anesthesia." Walter L. Mendenhall and Ruth Connolly..... 145
- Storage of vitamin B in pigeons. J. D. Pilcher and Torald Sollmann.. 145
- The pharmacological action of some poisonous gases with special reference to carbon monoxide. Oliver G. Chance and D. E. Jackson.. 145
- The effects of nitrous oxide, ethylene, ether and chloroform on the contractions of stomach, small intestine and colon during general anesthesia. G. H. Miller and O. H. Plant..... 147
- Experimental studies of acute poisoning by anilin and anilin derivatives. Albert G. Young..... 148
- Epinephrine in the treatment of angina pectoris. D. E. Jackson..... 148
- Distribution coefficients. J. C. Munch..... 149
- The liberation of adsorbed substances from the proteins. A function of the bile salts. Sanford M. Rosenthal..... 150
- Oxygen absorption by anthraquinone-beta-sulphonic acid in alkaline sodium hydrosulphite solution. T. K. Kruse..... 151
- Some observations upon the influence of phenobarbital on centres below the level of the fore-brain. Eugene N. Boudreau..... 151
- Cumulative tests of the possible toxicity of intarvin, with notes on its utility in the treatment of diabetes. Hattie L. Heft, Max Kahn, and William J. Gies..... 153
- The chemical and biological properties of pure arsphenamines. Philip Adolph Kober..... 154
- The relation between the undetermined nitrogen of the blood and its toxicity to lupinus albus seedlings. Joseph M. Looney and David I. Macht..... 155

Adrenalectomy and morphine tolerance in rats. J. M. Rogoff.....	155
The binding power of serum for drugs tested by a new in vitro method. R. Beutner	156
V. A pharmacologic and clinical investigation of sodium benzyl succinate "benzycin" and sodium dibenzyl phosphate "benzypfos" upon the respiratory and cardio-vascular systems. Charles M. Gruber	157
Some effects of arsonium, sulfonium and analogous compounds on the autonomic nervous system. Reid Hunt and R. R. Renshaw.....	158
Results obtained with tryparsamide in African sleeping sickness as indicated by examination of patients two to three years after treatment. Louise Pearce	159
The antagonism between sodium thiosulphate and arsenical compounds. H. A. Kuhn and A. S. Loevenhart	160
Experiments on the toxicity of acetanilid and caffeine on the frog's heart. E. D. Brown and D. E. Morehead	161
Some observations of experimental cocaine poisoning. A. T. Atkinson and A. L. Tatum	163
Effect of iodides on human nitrogen metabolism. G. P. Grabfield and A. M. Prentiss	163
The pharmacological action of gentian violet. Arthur W. Pindar and Irene C. Donnelly.....	163
The refractory period of the heart. E. W. Schwartze.....	165
Further studies on the excretion of dyes in the frog's kidney. Arthur D. Hirschfelder and Raymond N. Bieter	165
Behavior of certain oils when injected intraperitoneally. E. W. Schwartze and J. C. Munch	166
Does insulin significantly affect the blood concentration? W. F. Hamilton, H. G. Barbour and J. H. Warner.....	166
The chemo-therapeutic properties of a substance with a chain of four arsenic atoms. H. G. Barbour, G. B. Ridout and D. Claydon.....	166
On the absorption by the hyperplastic thyroid gland of various forms of iodine introduced intravenously. H. B. Van Dyke.....	166
The effects of orally ingested caffeine and theobromin upon the production and excretion of uric acid. Guy W. Clark and A. A. de Lorimer. 167	167
Proposed standardized method of study of compounds in experimental rabbit syphilis. George E. Wakerlin and A. S. Loevenhart.....	167
Antagonistic action of glycerol on insulin intoxication. C. Voegtlin, E. R. Dunn and J. W. Thompson	168
The University of Maryland Chronograph. Department of Pharmacology (Univ. of Maryland). O. G. Harne	168
Blood pressure records from the abdominal aorta. Arthur D. Hirschfelder and Raymond L. Gregory.....	170
An easily constructed manometer. Arthur D. Hirschfelder.....	170
A preliminary note on the effect of certain alcoholic beverages on the normal kidney. Wm. deB. MacNider	171
Therapia sterilisane magna: Results obtained with mercurochrome and gentian violet. Hugh H. Young	172
