The Journal of Pharmacology and Experimental Therapeutics

Editor:
Eva King Killam, PhD

JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology; as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. **Monthly**

Drug Metabolism and Disposition: *the biological fate of chemicals*

Editor:
Vincent G. Zannoni, PhD

Drug Metabolism and Disposition publishes *in vitro* and *in vivo* experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. The areas covered are: pharmacokinetics, pharmacodynamics and mechanisms, genetic, nutritional, or hormonal factors affecting the biological fate of chemicals, toxicological consequences of xenobiotic metabolism. **Bimonthly**

Pharmacological Reviews

Editor:
Robert E. Stitzel, PhD

Pharmacological Reviews is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical and cellular pharmacology; drug metabolism and disposition, renal pharmacology; neuropharmacology; behavioral pharmacology; clinical pharmacology; and toxicology. No library serving the pharmacologic community should be without a subscription. **Quarterly**

Molecular Pharmacology

Editor:
William A. Catterall, PhD

The papers published in **Molecular Pharmacology** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. **Monthly**
