

Broad coverage of pharmacology
in a prestigious journal

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS

Editor: **Eva King Killam, PhD**, School of Medicine, University of California, Davis

JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad coverage of all aspects of the interactions of chemicals with biological systems, including:

- autonomic pharmacology
- analgesia
- behavioral pharmacology
- cardiovascular pharmacology
- cellular pharmacology
- chemotherapy
- clinical pharmacology
- developmental pharmacology
- drug abuse
- drug metabolism & disposition
- gastrointestinal pharmacology
- immunopharmacology
- neuropharmacology
- pulmonary pharmacology
- renal pharmacology
- toxicology

JPET is valuable reading for academic, industrial and clinical pharmacologists as well as toxicologists. The Journal deserves a place in every pharmaceutical and toxicological research laboratory and pharmacology/toxicology department throughout the world.

Leading Pharmacology Journals

Publications of the American Society for
Pharmacology and Experimental Therapeutics, Inc.

The Journal of Pharmacology and Experimental Therapeutics

Editor:
Eva King Killam, PhD

JPET is respected the world over as one of the leading research journals in the field of pharmacology. Readers find broad

coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology, as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. **Monthly**

Drug Metabolism and Disposition: *the biological fate of chemicals*

Editor:
Vincent G. Zannoni, PhD

Drug Metabolism and Disposition publishes *in vitro* and *in vivo* experimental results that bring readers significant and

original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. The areas covered are: pharmacokinetics, pharmacodynamics and mechanisms, genetic, nutritional, or hormonal factors affecting the biological fate of chemicals, toxicological consequences of xenobiotic metabolism. **Bimonthly**

Pharmacological Reviews

Editor:
Robert E. Stitzel, PhD

Pharmacological Reviews is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical

and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. No library serving the pharmacologic community should be without a subscription. **Quarterly**

Molecular Pharmacology

Editor:
T. Kendall Harden, PhD

The papers published in Molecular Pharmacology are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics,

genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. **Monthly**

INFORMATION TO SUBSCRIBERS

THE JOURNAL OF PHARMACOLOGY AND EXPERIMENTAL THERAPEUTICS is issued monthly. Four volumes are published each year. Each volume contains three numbers.

Correspondence concerning business matters should be addressed to Williams & Wilkins, 428 East Preston St., Baltimore, MD 21202-3993 U.S.A.

Annual Subscription Rates—U. S. A. AND POSSESSIONS: personal, \$170.00; institutional, \$285.00; single copy, \$18.00. FOREIGN: personal, \$235.00; institutional, \$350.00; single copy, \$22.00. (Prices subject to change.) Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations. Foreign subscribers who wish to have issues sent by airmail may inquire of the publisher for the additional cost.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue.

To avoid a break in your series, subscriptions should be renewed promptly. The publisher cannot guarantee to supply back issues on belated renewals.

Reprints of individual articles are available *only* from authors.

Microfilm. For availability, inquire of Williams & Wilkins.

NAMES YOU KNOW.

Build productivity increases up to 3000% in Hemodynamic, Pulmonary, ECG and Isolated Tissue Studies.

An impressive list of companies from around the world report dramatic reductions in set-up and analysis time, thanks to MI²'s Signal Processing Centers (SPC's).

They report, "3 hours of manual analysis cut to 6 minutes...10 working days of data collection cut to a mere 3 hours—accurately, efficiently and according to the protocol." Plus, the SPC gives instantaneous analysis *in realtime* throughout the course of the experiments.

The result?

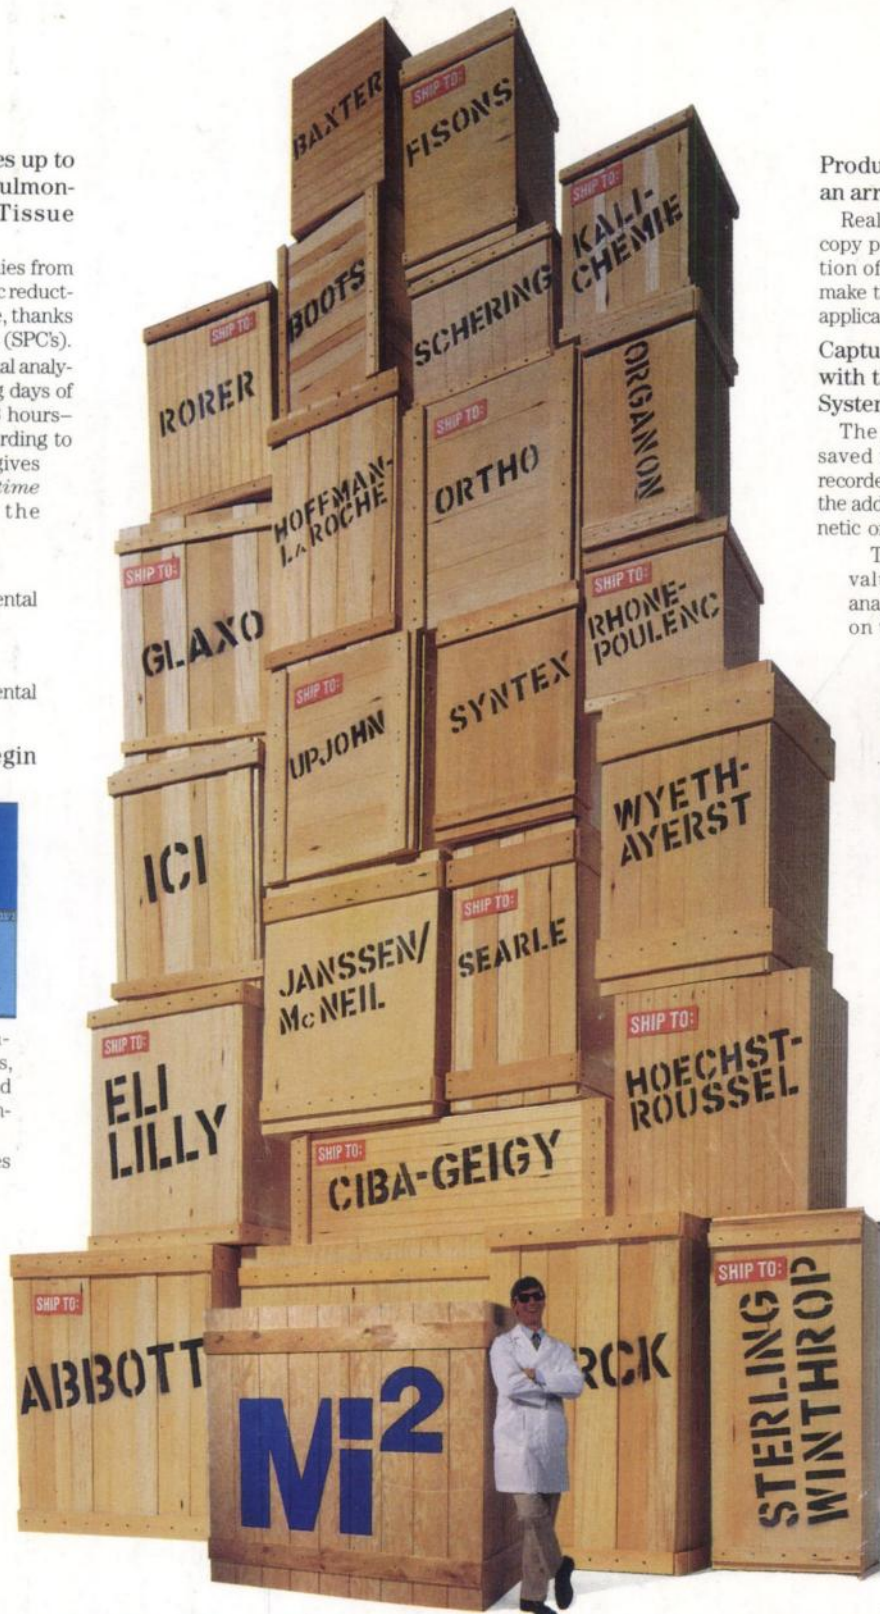

- Precise control over experimental parameters
- An end to manual analysis
- Completely accurate experimental data, from start to finish

Productivity increases begin with BioWindows™

The SPC's exclusive BioWindows feature acquires, analyzes, records, and stores both raw and analyzed data at the click of a single button.

And because BioWindows uses the OS/2 computer system architecture, many tasks can be performed at the same time.

Productivity gains continue with an array of powerful features.

Realtime waveform scrolling, hard-copy paper recording, and a full selection of the finest research amplifiers make the SPC capable of handling any application.

Capture all raw data automatically with the New SPC *Tape Recorder* System.

The SPC's *Tape Recorder* allows saved raw data to be re-scrolled, re-recorded, and re-analyzed, eliminating the additional cost of an expensive magnetic or VHS recorder.

The SPC provides maximum value-added data and minimum analysis time. For more information on the SPC system contact your nearest MI² representative.

The Signal Processing Center with amplifiers, stripchart recorder and accessories.
