## SYSTEMIX

SyStemix, Inc. is an exciting biotechnology company utilizing revolutionary technology — the SCID-hu mouse model for the study of human disease and its treatment. We are pioneering the clinical use of cellular therapies including human stem cell transplants for cancer treatment. In addition, a principal research focus is the identification and characterization of novel growth factors. We are seeking an experienced individual to join us in the following challenging opportunity:

### Transplantation Biologist

You will provide management and project direction for our Transplantation Biology group. This involves participation in multi-disciplinary research and development and contract research programs. Duties will include developing GLP compliance and supervising antibody and histology efforts. You should have a PhD, and/or DVM, and 3+ years' post-doctoral experience, including skills in transplantation biology, histopathology and immunochemistry.

In addition to our exciting environment and ideal location, we also offer an outstanding salary and benefits package, as well as equity participation. To apply, please send or fax your resume to: SyStemix, Inc., Human Resources, Job Code: 22, 3400 W. Bayshore Road, Palo Alto, CA 94303; (415) 856-4919. EOE.
