An important resource for everyone  
involved in research on the  
metabolism of drugs and chemicals

# DRUG METABOLISM AND DISPOSITION

The Biological Fate of Chemicals

Editor: Vincent G. Zannoni, PhD, University of Michigan,  
Ann Arbor, Michigan

**DRUG METABOLISM AND DISPOSITION** publishes *in vitro* and *in vivo* experimental results that bring readers significant and original information on xenobiotic metabolism and disposition, including metabolism of all pharmacologic agents or drugs and environmental chemicals, reactants, and preservatives. All papers are refereed to ensure a high standard of publication. The areas covered are:

- pharmacokinetics
- pharmacodynamics
- genetic, nutritional, and hormonal factors affecting the biological fate of chemicals
- toxicological consequences of xenobiotic metabolism

This journal should be a standard reference in all pharmacology and toxicology departments. It is also a valuable resource for all medicinal chemists involved in designing drugs and all biochemists involved with drug metabolism.

Bimonthly

## L-703,606 oxalate salt

**NEW**

Potent and selective  
non peptide neurokinin  
NK-1 antagonist.  
Cascieri et al. *Mol.*  
*Pharmacol.* **42**, 458 (1992).

Cat. No. L-119

## $\omega$ -Agatoxin-IVA ( $\omega$ -Aga-IVA)

Cat. No. A-181

Potent and selective P-type  
calcium channel blocker.  
Mintz et al. *Nature* **355**, 827 (1992).

## CGP-23996

Cat. No. C-176

A non-reducible analog of somatostatin  
suitable for iodination; the radioiodinated  
molecule can be used in binding assays  
for somatostatin receptors.  
Therms et al. *Neuroscience* **39**, 131 (1989).

## ( $\pm$ )-SKF-81297 hydrobromide

**NEW**

Full dopamine D<sub>1</sub> agonist.  
Domino et al. *J. Pharmacol. Exp.*  
*Ther.* **264**(1), 221 (1992).

Cat. No. S-143

Please call or write for our 1992/93 Catalog/Handbook listing over 800 pharmacologically active compounds.
