# MOLECULAR PHARMACOLOGY

Editor: **Raymond Dingledine, Ph.D.**  
Emory University School of Medicine  
Atlanta, Georgia

Is your special interest receptors and neurotransmitters...drug metabolism...antibiotic and anticancer drug actions...or other areas related to molecular basis of drug action? If so, you should be subscribing to **MOLECULAR PHARMACOLOGY**.

The editor's and editorial board's high standards ensure that the papers you read in **MOLECULAR PHARMACOLOGY** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anti-cancer drug action.
