

# INDEX

Volume 274, July–September, 1995

- A-61603,  $\alpha_1$  adrenoceptor-subtype selectivity, 97  
AA, see Arachidonic acid  
Abbott-61603, see A-61603  
Abdominal pressure, increase in, effects on hepatic fentanyl clearance, in neonatal lambs, 115  
Abe, H., see Toide, K., 1370  
Abete, P., see Ferrara, N., 858  
Abood, M. E. and Tao, Q.: Characterization of a *delta* opioid receptor in rat pheochromocytoma cells, 1566  
Absence seizures, SCH 50911 effects against, in lethargic mouse,  $\gamma$ -hydroxybutyrate, and pentylenetetrazole models, 1399  
Acetazolamide, albumin effects of renal elimination, in rat, 752  
Acetic acid, inflammatory bowel disease induced by, effects of ICAM-1 antibodies in, 475  
N-Acetoxy-sulfamethoxazole, *in vitro* formation, disposition and toxicity, 1099  
Acetyl-L-carnitine  
  effects in congenital hyperammonemia, in *spf* mice, 437  
  renal disposition, in rat kidney, 1122  
Acetylcholine  
  endothelium-independent relaxation by, in canine retinal and cerebral arteries, 1507  
  extracellular striatal levels, correlation with CP-99,994 reversal of catalepsy, 928  
  pulmonary effects, NO modulation of, in rabbit lungs, 589  
  synaptic release, ATP inhibition of, in submucosal neurons, 1238  
  urinary bladder secretion, presynaptic muscarinic receptors that regulate, in guinea pig, 458  
Acetylcholine channels, potencies of volatile anesthetics in, in BC<sup>3</sup>H1 cells, 1355  
Acetylcholine receptors  
  muscarinic  
    AF-DX 384 ligand, cingulate cortex binding, in rabbit, 562  
    human peripheral airway subtypes, pharmacology of, 1293  
  M<sub>1</sub>  
    allosterism on, 1077  
    Ins(1,4,5)P<sub>3</sub> and cAMP coupling, in CHO cells, 134  
    irsoxazine activation of gap-junctional intercellular communication through, 815  
    ligand binding properties, 378  
  M<sub>2</sub>  
    allosterism on, 1077  
    Ins(1,4,5)P<sub>3</sub> and cAMP coupling, in CHO cells, 134  
    ligand binding properties, 378  
M<sub>3</sub>  
  allosterism on, 1077  
  Ins(1,4,5)P<sub>3</sub> and cAMP coupling, in CHO cells, 134  
  ligand binding properties, 378  
M<sub>4</sub>  
  allosterism on, 1077  
  ligand binding properties, 378  
M<sub>5</sub>  
  allosterism on, 1077  
  ligand binding properties, 378  
  presynaptic, in guinea pig urinary bladder, classification of, 458  
  prostate subtypes, in human, 976  
  subtypes expressed in baculovirus-infected insect cells, ligand binding properties, 378  
nicotinic  
  hippocampal, agonist effects, in rat, 771  
  mediation of hippocampal NE and striatal DA release by, in rat brain slices, 224  
  neuropeptide Y (18-36) modulation of, 891  
Acetylcholinesterase  
  in congenital hyperammonemia, in *spf* mice, 437  
  selectivity of cholinesterase inhibitors for, 767  
Acs, G., Palkovits, M. and Blumberg, P. M.: Trifluoperazine modulates [<sup>3</sup>H]resiniferatoxin binding by human and rat vanilloid (capsaicin) receptors and affects <sup>45</sup>Ca uptake by adult rat dorsal root ganglion neurons, 1090  
Active oxygen, tea catechin amelioration of related nerve cell injuries, 602  
Acute renal failure, glycerol, endothelin effects in, in rats, 481  
Adams, J. L., see Marshall, L. A., 1254  
Adenosine, interactions with opioids, 1387  
Adenosine diphosphate-ribosylation, protein, inhibition of, and diabetes, 570  
Adenosine receptors  
  A<sub>1</sub>, in intestinal muscle cells, 300  
  A<sub>2b</sub>, in intestinal muscle cells, 300  
  blockade, mediation of caffeine-induced rotational behavior by, 207  
Adenosine 5'-triphosphate, inhibition of ACh release by, in submucosal neurons, 1238  
Adler, M. W., see Handler, C. M., 284  
Adrenergic receptors,  $\alpha_1$  subtypes, A-61603 selectivity, 97  
Adriamycin, resistance in MDR human breast cancer cells, thaliblastine reversal of, 1271  
AF-DX 384, cingulate cortex binding, in rabbit, 562  
Age, effects of food restriction on drug metabolism and, in female BN/BiRij rat, 143  
Agmatine, effects on gastric secretion and mucosal injury, in rats, 741  
Aharony, D., Buckner, C. K., Ellis, J. L., Ghanebar, S. V., Graham, Z., Kays, J. S., Little, J., Meeker, S., Miller, S. C., Undem, B. J. and Waldron, I. R.: Pharmacological characterization of a new class of nonpeptide neurokinin A antagonists that demonstrate species selectivity, 1216  
Ahern, G. P., see Premkumar, L. S., 718  
AHN 086, neutrophil stimulation and cell surface expression of heat shock proteins induced by, in dog, 242  
Aida, Y., see Sato, R., 469  
Airways  
  Cl secretion, NO effects in, in rabbit trachea, 584  
  human peripheral, muscarinic receptor subtypes in, pharmacology of, 1293  
Akkermans, L. M. A., see Briejer, M. R., 641  
Akunne, H. C., see Pugsley, T. A., 898  
Alberts, P.: Classification of the presynaptic muscarinic receptor subtype that regulates <sup>3</sup>H-acetylcholine secretion in the guinea pig urinary bladder *in vitro*, 458  
Albumin, effects on renal elimination of acetazolamide, in rat, 752  
Albuquerque, E. X., see Alkondon, M., 771  
Alcohol, see Ethanol  
Alcuronium, allosterism on muscarinic receptors, 1077  
Alfentanil, naloxone and spontaneous reversal of, 34  
Alkaline phosphatase, paclitaxel phosphate prodrug tubulin polymerization after metabolic activation by, 879  
Alkondon, M. and Albuquerque, E. X.: Diversity of nicotinic acetylcholine receptors in rat hippocampal neurons. III. Agonist actions of the novel alkaloid epibatidine and analysis of type II current, 771  
Allard, M., Labrouche, S., Nosjean, A. and Laguzzi, R.: Mechanisms underlying the cardiovascular responses to peripheral administration of NPFF in the rat, 577  
Allodynia, thermal, effects of morphine and ketorolac on, in rhesus monkeys, 805  
Allosterism, on muscarinic receptors, 1077  
Alveolar macrophages, superoxide anion modulation in, in rat, 427  
Alveolar type II cells, differentiation during fetal lung development, effects of EGF vs betamethasone on, in rhesus monkeys, 1025  
Alzheimer's disease, dementia in, cholinesterase inhibitors for, 767

- Ambrosio, G., *see* Ferrara, N., 858
- Amidon, G. L., *see* Taki, Y., 373
- Amin, H. M., Sopchak, A. M., Esposito, B. F., Henson, L. G., Batenhorst, R. L., Fox, A. W. and Camporesi, E. M.: Naloxone-induced and spontaneous reversal of depressed ventilatory responses to hypoxia during and after continuous infusion of remifentanil or alfentanil, 34
- Amine transporters, novel [<sup>125</sup>I]RTI-55 binding site, in membranes from whole rat brain minus caudate, 385
- $\gamma$ -Aminobutyric acid, corticosterone potentiation of morphine effects, in rat striatum/nucleus accumbens, 1154
- $\gamma$ -Aminobutyric acid<sub>A</sub> receptors modulation by propofol, 962 recombinant human, effects of propofol on, 353 spinal, modulation of stress/ $\delta$ -2 analgesia by, 730 uncoupling, by GABA<sub>A</sub> and benzodiazepine agonists, 1484
- $\gamma$ -Aminobutyric acid<sub>B</sub> receptors antagonist SCH 50911 pharmacology, 1393 SCH 50911 antiabsence effects, 1399
- Aminoglycoside nephrotoxicity, 258 renal brush border membrane binding, 258
- p-Aminohippurate transporter, in OK kidney epithelial cells, 1161
- $\alpha$ -Amino-3-hydroxy-5-methylisoxazole-4-propionate/kainate, effects on cocaine-induced increase in extracellular dopamine, in nucleus accumbens, 127
- $\alpha$ -Amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid, antagonist NBQX, behavioral pharmacology, 1113
- 2-Amino-N-(1,2-diphenylethyl)-acetamide hydrochloride, *see* FPL 13950
- Aminoxyacetate, stimulation of renal fluorescein uptake by, in rat, 1204
- Amlodipine, cardiovascular selectivity, 419
- AMPA, *see*  $\alpha$ -Amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid
- Amphetamines behavioral effects, modification by L-type calcium channel blockers, in squirrel monkeys, 842 chronic, effects on prenatal ethanol-induced changes in dopamine receptors, electrophysiological findings, 1054 dopamine efflux profile, 90 extracellular caudate/putamen levels, after dosage that produced behavioral or neurotoxic effects, 614 transmitter responses, 231
- Analgesics, *see also* Antinociception cold water swim stress, modulation by spinal GABA<sub>A</sub> receptors, 730  $\delta$ -opioid, modulation by spinal GABA<sub>A</sub> receptors, 730 morphine, in rat, 852 morphine-6- $\beta$ -D-glucuronide, in rat, 852 OHM3295-induced, 1285
- Analgesics, centrally acting, serotonin and norepinephrine uptake inhibition by, 1263
- Anderson, D. C., *see* Wong, P. Y.-K., 475
- Anderson, J. J., Randall, S. and Chase, T. N.: The neurokinin<sub>1</sub> receptor antagonist CP-99,994 reduces catalepsy produced by the dopamine D<sub>2</sub> receptor antagonist raclopride: Correlation with extracellular acetylcholine levels in striatum, 928
- Anemia, dapsone-induced hemolytic, 540
- Anesthetics local, effects on central dopaminergic neurotransmission, 707 volatile concentration-effect relationship in vessels, nonsteady-state modeling of, 293 potencies in ACh-activated channels, in BC<sup>3</sup>H1 cells, 1355
- Angiogenesis, in chronic granulomatous inflammation, pharmacological modulation of, 1463
- Angiotensin-dependent hypertension, effects on L-arginine effects in aortic rings, in rats, 1
- Angiotensin II receptors antagonist U-97018 pharmacology, 1042 AT<sub>2</sub> binding sites, 1129 SB 203220 antagonism, 1222
- Angiotensin receptors, intracerebroventricular antagonist cardiovascular effects, in Dahl salt-sensitive rats, 745
- Animal models guinea pig ventricular free wall model of ischemia-reperfusion, saralasin antiarrhythmic effects in, 1379 hydroxybutyrate rat model of absence seizures, SCH 50911 antiabsence effects in, 1399 of hypoxia and global ischemia, FPL 13950 neuroprotection in, 991 lethargic mouse model of absence seizures, SCH 50911 antiabsence effects in, 1399 murine model of endotoxin shock, SB 203347 effects in, 1254 pentylenetetrazole rat model of absence seizures, SCH 50911 antiabsence effects in, 1399 piglet model of delayed-phase cisplatin-induced emesis, 951 primate model of cocaine and heroin combination polydrug abuse, 1325 rat middle cerebral artery occlusion model of stroke, strain-dependent drug effects in, 1008 tail-suspended rat model of weightlessness, antipyrene pharmacokinetics in, 345
- Anions monocarboxylic, effects of  $\beta$ -lactams on, 194 organic, intracellular  $\alpha$ -ketoglutarate control of renal transport, 1278 superoxide, modulation of, in rat alveolar macrophages, 427
- ANP, *see* Atrial natriuretic peptide
- Ansay, A., *see* Delaunois, A., 589
- Antiarrhythmic drugs class Ic, suppression of proarrhythmia of, in dogs, 508 class III, MS-551, block of inward rectifier potassium channel by, in guinea pigblock ventricular myocytes, 469 saralasin, in guinea pig ventricular free wall model of ischemia-reperfusion, 1379
- Antibodies, to ICAM-1, effects in acetic acid-induced inflammatory bowel disease, 475
- Anticipation, MAP-induced, in rats, 688
- Anticonvulsants, NBQX effects, 1113
- Antidepressant drugs, acute and repeated, effects on extracellular 5-HT, 866
- Antinociception, *see also* Analgesia  $\delta$ -opioid, antagonism by intrathecal 7-benzylidenenaltrexone, in rat, 1317  $\beta$ -EP-induced, NO modulation of, in mouse, 8 morphine-induced, NO modulation of, in mouse, 8 opioid/nucleoside transport inhibitor interactions, 1387
- Antipsychotics iloperidone, pharmacology of, 1404 OPC-14597, effects on dopamine receptors, 329 potential, Cl-1007 neurochemical effects, 898 neurophysiological and behavioral effects, 912
- Antipyrene metabolism, effects of dietary restriction on, in aging female BN/BiRij rat, 143 pharmacokinetics, in tail-suspended rat model, 345
- Antisense oligonucleotides, study of functional role of 5-HT<sub>6</sub> receptor in rat brain with, 173
- Anxiolytics, NBQX effects, 1113
- Aortic rings, vasorelaxant effects of L-arginine in, in hypertensive rats, 1
- Apel, M., *see* Neumann, J., 530
- Apoptosis, diphenylhydantoin induction of, in rat cerebellar granule neurons, 983
- Arachidonic acid human neutrophil metabolism, SB 203347 effects on, 1254 modulation of superoxide generation by, in rat alveolar macrophages, 427 release by inhibition of CoA-independent transacylase, 1338
- Aretha, C. W., Sinha, A. and Galloway, M. P.: Dopamine D<sub>3</sub>-preferring ligands act at synthesis modulating autoreceptors, 609
- Argentieri, T. M., *see* Sheldon, J. H., 723
- Argenzio, R. A., *see* Rhoads, J. M., 404
- L-Arginine, vasorelaxant effects in aortic rings, in hypertensive rats, 1
- L-Arginine/nitric oxide pathway, nebivolol vasodilation via, in human forearm, 1067
- Arrhythmia, saralasin effects against, in guinea pig ventricular free wall model of ischemia-reperfusion, 1379

- Arterioles, submucosal, P<sub>2X</sub>-mediated vasoconstriction of, in guinea pig ileum, 1425
- Arthus reaction, reverse passive, elastase inhibition in, in rats, 548
- Asai, Y., *see* Murata, S., 1524

An important resource for everyone involved in research on the metabolism of drugs and chemicals

# DRUG METABOLISM AND DISPOSITION

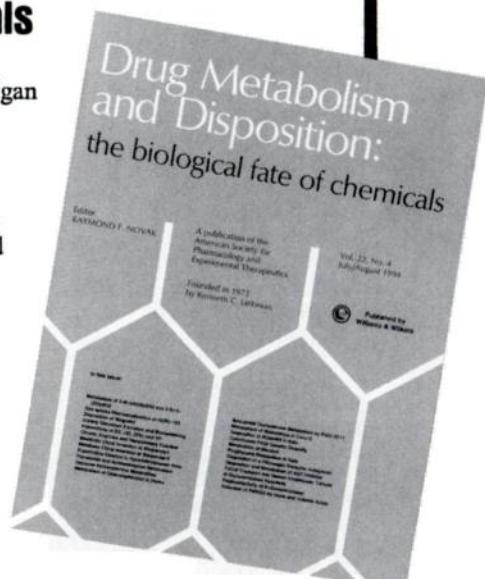

## The Biological Fate of Chemicals

Editor: Raymond F. Novak, Ph.D., Wayne State University, Detroit, Michigan

**DRUG METABOLISM AND DISPOSITION** publishes experimental results from *in vitro* and *in vivo* systems that bring readers significant and original information on the metabolism and disposition of endogenous and exogenous compounds, including the metabolism of therapeutic agents and environmental chemicals. The journal also invites timely reviews, short communications and letters to the Editor. All submissions are refereed to ensure a high standard of publication. The areas covered are:

- metabolism, metabolite identification and mechanisms of metabolite formation
- expression of drug metabolizing enzymes
- regulation of drug metabolizing enzyme gene expression
- toxicological consequences of xenobiotic metabolism
- pharmacokinetics
- pharmacodynamics

This journal should be a standard reference in all pharmacology and toxicology departments. It is also a valuable resource for all medicinal chemists involved in drug design and all biochemists with interest in drug metabolism, expression or drug metabolizing enzymes and regulation of drug metabolizing enzyme gene expression. *Monthly*

## **Assistant or Associate Professor of Pharmacology**

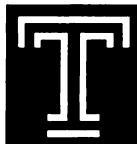

### **Department of Pharmaceutical Sciences**

Temple University School of Pharmacy invites applicants for a tenure track position at the level of Assistant or Associate Professor in Pharmacology, with a strong emphasis in biochemical/molecular pharmacology. The successful candidate will participate in professional and graduate teaching and will have a strong commitment to high quality teaching and a vigorous research program. Applicants should possess a Ph.D. in Pharmacology and preferably have post-doctoral experience.

Applicants should submit curriculum vitae, including name and addresses of two references to Dr. Peter H. Doukas, Dean, Temple University School of Pharmacy, 3307 North Broad Street, Philadelphia, PA 19140. (215) 707-4990.

*Temple University is an Equal Opportunity/Affirmative Action Employer*

Williams & Wilkins is your source  
for back issues of this journal in microform.

Microfilm editions are available for this journal direct from the publisher. Many Williams & Wilkins journals are also available for a single volume year or on a standing order basis.

For ordering information: Write to the address below or call TOLL FREE 1-800-638-6423.

**Formats available:**

16-mm reel open reel (positive or negative)  
16 3M cartridge (positive or negative)  
16-mm Ektamate/ANSI (positive or negative)  
35-mm open reel (positive or negative)  
microfiche (positive or negative)

**Mail to:**

Newsworthy and timely articles keep you up-to-date in your field.

# MOLECULAR PHARMACOLOGY

Editor: Raymond Dingledine, Ph.D.  
Emory University School of Medicine  
Atlanta, Georgia

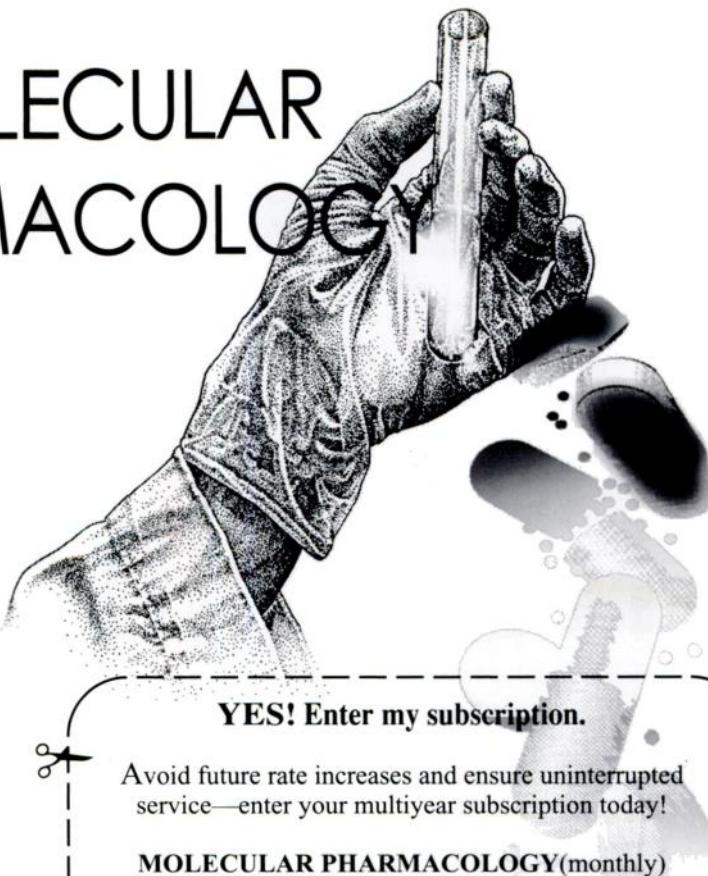

Is your special interest receptors and neurotransmitters...drug metabolism...antibiotic and anticancer drug actions...or other areas related to molecular basis of drug action? If so, you should be subscribing to **MOLECULAR PHARMACOLOGY**.

The editor's and editorial board's high standards ensure that the papers you read in **MOLECULAR PHARMACOLOGY** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anti-cancer drug action. Start your subscription today to ensure access to the most newsworthy papers in your field. *Monthly*
