HELL IS THE PLACE WHERE NOTHING CONNECTS — T.S. ELIOT

reliable reference linking, powered by CrossRef

Linking to and from this journal is powered by CrossRef. CrossRef links millions of articles and chapters, from thousands of publications, from hundreds of publishers. So your reference linking works. Permanently. Take a tour at www.crossref.org. And make sure all your published work is CrossRef-enabled.
WE ARE

PHARMACOLOGISTS

The Federation of American Societies for Experimental Biology is a coalition of life science societies dedicated to enhancing the quality of life through research. If you are a member of the American Society for Pharmacology and Experimental Therapeutics you—like more than 65,000 other scientists—are a member of FASEB. FASEB strives to provide support in public affairs, distinguished publications, invaluable meetings and conferences, and a variety of member services.

FASEB—we are life scientists and we work for you. www.faseb.org
The Washington DC Principles is a commitment from 50 (and growing) not-for-profit medical/scientific societies and publishers to provide free access and wide dissemination of published research findings.

The DC Principles provide what has been called the needed “middle ground” in the increasingly heated debate between those who advocate immediate unfettered online access to medical and scientific research findings and advocates of the current journal publishing system. The document was drafted in response to recent claims that these publishers’ practices hinder the public’s ability to access published scientific research.

The 7 Principles

1. As not-for-profit publishers, we see it as our mission to maintain and enhance the independence, rigor, trust, and visibility that have established scholarly journals as reliable filters of information emanating from clinical and laboratory research.

2. As not-for-profit publishers, we reinvest all of the revenue from our journals in the direct support of science worldwide, including scholarships, scientific meetings, grants, educational outreach, advocacy for research funding, the free dissemination of information for the public, and improvements in scientific publishing.

3. As not-for-profit publishers, we have introduced and will continue to support the following forms of free access:
   a. Selected important articles of interest are free online from the time of publication;
   b. The full text of our journals is freely available to everyone worldwide either immediately or within months of publication, depending on each publisher’s business and publishing requirements;
   c. The content of our journals is available free to scientists working in many low-income nations;
   d. Articles are made available free online through reference linking between these journals;
   e. Our content is available for indexing by major search engines so that readers worldwide can easily locate information.

4. We will continue to work to develop long-term preservation solutions for online journals to ensure the ongoing availability of the scientific literature.

5. We will continue to work with authors, peer-reviewers, and editors for the development of robust online and electronic tools to improve efficiency of their important intellectual endeavors.

6. We strongly support the principle that publication fees should not be borne solely by researchers and their funding institutions, because the ability to publish in scientific journals should be available equally to all scientists worldwide, no matter what their economic circumstances.

7. As not-for-profit publishers, we believe that a free society allows for the co-existence of many publishing models, and we will continue to work closely with our publishing colleagues to set high standards for the scholarly publishing enterprise.
Molecular Interventions is catching on. Are you?

Catch on to all the latest in biomedical research.

Fully indexed in PubMed/Medline, BBCI, EMBASE, ISI, and SCI-Expanded.

You and your students are sure to enjoy each engagingly written and beautifully designed issue of Molecular Interventions. See for yourself! Request a sample copy* or view MI online at http://molinterv.org.

**Review Articles:**

- Ghrelin and Regulation of Food Intake
- Macromolecular Therapeutics
- Circadian Photoreception in Humans
- Protein Origami
- Cytokines and Growth Factors
- Molecular Genetics of Human Cognition
- Small Interfering RNAs
- Apolipoprotein E, Amyloid, and Alzheimer Disease
- GAF Domains
- Therapeutic Intervention after Spinal Cord Injury
- Hypoxia-Inducible Factors
- Non-nuclear Actions of Estrogen
- Expression Array Technology in Breast Cancer
- Lipid Homeostasis
- Biogenesis of G Protein-Coupled Receptors
- Pharmacologically Distinct GABA<sub>B</sub> Receptors
- Gene Transfer to Skeletal Muscle...

**Viewpoint**

Dispatches from the front lines of research

**CrossTalk**

Interviews with people in the world of pharmacology

**Reflections**

Science in the cultural context

**Net Results**

Sites of interest on the World Wide Web

**Beyond the Bench**

Representations of pharmacology and science in the media

Improving research protections means improving research quality.

Demonstrate your organization’s commitment to human research protections through accreditation.

AAHRPP accreditation…

• improves your human research protection program
• assists your organization in achieving regulatory compliance
• helps your organization compete for sponsored research
• “raises the bar” in overall research quality
• builds and enhances public trust

Why Publish with ASPET?

Because ASPET gives you these advantages:

♦ **Low Page Charges** — $35/page for ASPET members, $70/page for nonmembers (publishing one paper can save the $125 membership dues)

♦ **Low Color Fees** — $200/color figure for ASPET members, $400/color figure for nonmembers

♦ **Online Manuscript Submission** — submit your manuscript 24/7 — whenever it suits your schedule; online peer review reduces review times; track the progress of your manuscript through the review process

♦ **Publish Online Ahead of Print** — manuscripts are published online shortly after acceptance — at least two months prior to print publication

♦ **Wide Dissemination** — accepted manuscripts are freely accessible immediately; fully formatted articles are freely accessible 12 months after publication; low-cost pay-per-view option for nonsubscribers; abstracts and tables of contents always freely accessible

Visit www.aspetjournals.org to access each ASPET journal.

ASPET Journals — Widely Read, Highly Respected
Biomarkers & Human Tissues

- Normal and Diseased Tissues, and Extracts
  - Alzheimer’s, Diabetes, Arthritis, etc.
- Surgical Samples
- Matched Blood and Body Fluids
- Fresh, Frozen, and Formalin-Fixed
- Pathological Verification
- IRB Approval, HIPAA Compliance
- Medical and Legal Documentation
