Introducing our latest addition.
Our new Model 2006 has a 200 µl reservoir, 6 week duration at 0.15 µl/hr.

Test your hypotheses – not your research tools. ALZET® pumps are proven technology; more than 10,000 published studies demonstrate their reliable use to deliver a wide range of test agents. We now offer 12 pump models designed to infuse from 1 day to 6 weeks in animals from small mice to large cattle. No batteries to fail or software to learn; use the peace of mind and extra time to design your next study.

With ALZET Catheters – test your drug’s effects nearly anywhere.
If you choose to use a catheter, such as for IV or targeted delivery, select from among 10 different ALZET catheters. Designed with your methods in mind, these catheters include features such as suture anchors and specially sized tips to streamline your surgeries. Connect a catheter to any ALZET pump and deliver the agent right to the target site. Determine whether your compound has the effect you predicted, while avoiding drug side effects that can result from systemic dosing.

Visit alzet.com for more information on our two newest pumps, or references in your area of interest. Or, contact us directly for more details by phone (877-922-5938) or e-mail (alzetcs@durect.com).

Contents

PERPECTIVES IN PHARMACOLOGY
Progress in Brain Penetration Evaluation in Drug Discovery and Development
Xingrong Liu, Cuiping Chen, and Bill J. Smith 349

BEHAVIORAL PHARMACOLOGY
Effects of a Cannabinoid1 Receptor Antagonist and Serotonin2C Receptor Agonist Alone and in Combination on Motivation for Palatable Food: A Dose-Addition Analysis Study in Mice
Sara Jane Ward, Timothy W. Lefever, Cavario Jackson, Ronald J. Tallarida, and Ellen A. Walker 567

Food Restriction Alters N’-Propyl-4,5,6,7-tetrahydrobenzothiazole-2,6-diamine dihydrochloride (Pramipexole)-Induced Yawning, Hypothermia, and Locomotor Activity in Rats: Evidence for Sensitization of Dopamine D2 Receptor-Mediated Effects
Gregory T. Collins, Diane M. Calinski, Amy Hauck Newman, Peter Grundt, and James H. Woods 691

CARDIOVASCULAR
Endothelial Dysfunction in Rat Mesenteric Resistance Artery after Transient Middle Cerebral Artery Occlusion
Sonia Martinez-Revelles, Francesc Jiménez-Altabó, Laura Caracuel, Fernando J. Pérez-Asensio, Anna M. Planas, and Elisabet Vila 363

Antiatherosclerotic Effects of Small-Molecular-Weight Compounds Enhancing Endothelial Nitric-Oxide Synthase (eNOS) Expression and Preventing eNOS Uncoupling
Paulus Wohlfart, Hui Xu, Alexandra Endlich, Alice Habermeyer, Ellen I. Closs, Thomas Hubschle, Christian Mang, Hartmut Strobel, Teri Suzuki, Hartmut Kleinert, Ulrich Förstermann, Hartmut Ruetten, and Huige Li 370

Delivery of Acid Sphingomyelinase in Normal and Niemann-Pick Disease Mice Using Intercellular Adhesion Molecule-1-Targeted Polymer Nanocarriers
Carmen Garnacho, Rajwinder Dhami, Eric Simone, Thomas Dziubla, John Leferovich, Edward H. Schuchman, Vladimir Muzykantov, and Silvia Muro 400

Oxygenated Perfluorochemicals Improve Cell Survival during Reoxygenation by Pacifying Mitochondrial Activity
Amina Arab, Klaus Kuemmerer, Jin Wang, Christoph Bode, and Christoph Hehrlein 417

In Vivo Activation of Peroxisome Proliferator-Activated Receptor-δ Protects the Heart from Ischemia/Reperfusion Injury in Zucker Fatty Rats
Tian-Li Yue, Sandhya S. Nerurkar, Weike Bao, Beat M. Jucker, Lea Sarov-Blat, Klaudia Steplewski, Eliot H. Ohlstein, and Robert N. Willette 466
Vascular KCNQ Potassium Channels as Novel Targets for the Control of Mesenteric Artery Constriction by Vasopressin, Based on Studies in Single Cells, Pressurized Arteries, and in Vivo Measurements of Mesenteric Vascular Resistance

Cardioprotective and Survival Benefits of Long-Term Combined Therapy with $\beta_2$ Adrenoreceptor (AR) Agonist and $\beta_1$ AR Blocker in Dilated Cardiomyopathy Postmyocardial Infarction

An Estrogen Metabolite, 2-Methoxyestradiol, Disrupts Cardiac Microtubules and Unmasks Muscarinic Inhibition of Calcium Current

Jian-Bing Shen and Achilles J. Pappano

CELLULAR AND MOLECULAR

Regulation of Dedifferentiation and Redifferentiation in Renal Proximal Tubular Cells by the Epidermal Growth Factor Receptor

Mark A. Hallman, Shougang Zhuang, and Rick G. Schnellmann

$a$-Aminoaaheterocyclic-Methylglyoxal Adducts Do Not Inhibit Cystic Fibrosis Transmembrane Conductance Regulator Chloride Channel Activity

N. D. Sonawane, Olga Zegarra-Moran, Wan Namkung, Luis J. V. Galieta, and A. S. Verkman

Noncompetitive Antagonism and Inverse Agonism as Mechanism of Action of Nonpeptidergic Antagonists at Primate and Rodent CXCR3 Chemokine Receptors

UDP Is a Competitive Antagonist at the Human $P_2Y_{14}$ Receptor

CHEMOTHERAPY, ANTIBIOTICS, AND GENE THERAPY

Statin-Induced Inhibition of 3-Hydroxy-3-Methyl Glutaryl Coenzyme A Reductase Sensitizes Human Osteosarcoma Cells to Anticancer Drugs

Olivia Fromigué, Zahia Hamidouche, and Pierre J. Marie

Cytokeratin-RNA Cross-Linking Mediated by the Antitumor Aminoflavone, 5-Amino-2,3-fluorophenyl-6,8-difluoro-7-methyl-4$H$-1-benzopyran-4-one

Ling-hua Meng, Zhaojing Meng, Ze-hong Miao, Timothy D. Veenstra, and Yves Pommier

GASTROINTESTINAL, HEPATIC, PULMONARY, AND RENAL

Thioredoxin-1 Ameliorates Cigarette Smoke-Induced Lung Inflammation and Emphysema in Mice

Atsuyasu Sato, Yuma Hoshino, Tomijiro Hara, Shigeo Muro, Hajime Nakamura, Michiaki Mishima, and Junji Yodoi

Drug-Induced Alterations to Gene and Protein Expression in Intestinal Epithelial Cell 6 Cells Suggest a Role for Calpains in the Gastrointestinal Toxicity of Nonsteroidal Anti-Inflammatory Agents

N. N. Raveendran, K. Silver, L. C. Freeman, D. Narvaez, K. Weng, S. Ganta, and J. D. Lillich

Tetrathiomolybdate Protects against Bile Duct Ligation-Induced Cholestatic Liver Injury and Fibrosis

Ming Song, Zhenyu Song, Shirish Barve, Jingwen Zhang, Theresa Chen, Marcia Liu, Gavin E. Arteel, George J. Brewer, and Craig J. McClain

Isoflavones Promote Mitochondrial Biogenesis

Kyle A. Rasbach and Rick G. Schnellmann

INFLAMMATION, IMMUNOPHARMACOLOGY, AND ASTHMA

MF498 [N-[(5,9-Diethoxy-6-oxo-6,8-dihydro-7H-pyrrolo[3,4-g]quinolin-7-yl)-3-methylbenzylsulfonyl]-2-(2-methoxyphenyl)acetamide], a Selective $E$ Prostanoid Receptor 4 Antagonist, Relieves Joint Inflammation and Pain in Rodent Models of Rheumatoid and Osteoarthritis

Patsy Clark, Steven E. Rowland, Danielle Denis, Marie-Claude Mathieu, Rino Stocco, Hugo Poirier, Jason Burch, Yongxin Han, Laurent Audoly, Alex G. Therien, and Daigen Xu
Prostaglandin I\(_2\) Plays a Key Role in Zymosan-Induced Mouse Pleurisy

Relation between mRNA Expression Level of Multidrug Resistance 1/ABCB1 in Blood Cells and Required Level of Tacrolimus in Pediatric Living-Donor Liver Transplantation

Maki Goto, Satohiro Masuda, Tetsuya Kiuchi, Yasuhiro Ogra, Fumitaka Oke, Koichi Tanaka, Shinji Uemoto, and Ken-ichi Inui

Structural Requirements for Activation of the 5-Oxo-6E,8Z,11Z,14Z-eicosatetraenoic Acid (5-Oxo-ETE) Receptor: Identification of a Mead Acid Metabolite with Potent Agonist Activity

Pranav Patel, Chantal Cossette, Jaganmohan R. Anumolu, Sylvie Gravel, Alain Lesimple, Orval A. Mamer, Joshua Rokach, and William S. Powell

METABOLISM, TRANSPORT, AND PHARMACOGENOMICS

Substrate-Dependent Effects of Human ABCB1 Coding Polymorphisms

Jason M. Gow, Laura M. Hodges, Leslie W. Chinn, and Deanna L. Kroetz

NF-E2-Related Factor 2 Inhibits Lipid Accumulation and Oxidative Stress in Mice Fed a High-Fat Diet

Yuji Tanaka, Lauren M. Aleksunes, Ronnie L. Yeager, Maxwell A. Gyamfi, Noriko Esterly, Grace L. Guo, and Curtis D. Klaassen

NEUROPHARMACOLOGY

Activities of 7-Nitroindazole and 1-(2-(Trifluoromethylphenyl)imidazole Independent of Neuronal Nitric-Oxide Synthase Inhibition

Nobuko Matsumura, Kazue Kikuchi-Utsumi, and Toshio Nakaki

Modeling the Binding and Function of Metabotropic Glutamate Receptors

Xavier Rovira, David Roche, Juan Serra, Julie Kniazeff, Jean-Philippe Pin, and Jesús Giraldo

Activation of Muscarinic Cholinergic Receptors on Human SH-SY5Y Neuroblastoma Cells Enhances Both the Influx and Efflux of K\(^+\) under Conditions of Hypo-Osmolarity

Daniel J. Foster, Anne M. Heacock, Richard F. Keep, and Stephen K. Fisher

Unexceptional Seizure Potential of Tramadol or Its Enantiomers or Metabolites in Mice

Robert B. Raffa and Dennis J. Stone, Jr.

Delivery of Galanin-Like Peptide to the Brain: Targeting with Intranasal Delivery and Cyclodextrins

Naoko Nonaka, Susan A. Farr, Haruaki Kageyama, Seiji Shioda, and William A. Banks

Neurotensin in the Ventral Pallidum Increases Extracellular \(\gamma\)-Aminobutyric Acid and Differentially Affects Cue- and Cocaine-Primed Reinstatement

Mary M. Torregrossa and Peter W. Kalivas

Lorcaserin, a Novel Selective Human 5-Hydroxytryptamine\(_{2C}\) Agonist: in Vitro and in Vivo Pharmacological Characterization

William J. Thomsen, Andrew J. Grottick, Frederique Menzaghi, Hazel Reyes-Saldana, Stephen Espitia, Diane Yuskin, Kevin Whelan, Michael Martin, Michael Morgan, Weichao Chen, Hussien Al-Shamma, Brian Smith, Derek Chalmers, and Dominic Behan

β-Phenylethylamine Alters Monoamine Transporter Function via Trace Amine-Associated Receptor 1: Implication for Modulatory Roles of Trace Amines in Brain

Zhihua Xie and Gregory M. Miller

Modulation of Monoamine Transporters by Common Biogenic Amines via Trace Amine-Associated Receptor 1 and Monoamine Autoreceptors in Human Embryonic Kidney 293 Cells and Brain Synaptosomes

Zhihua Xie, Susan V. Westmoreland, and Gregory M. Miller

First in Vivo Evidence for a Functional Interaction between Chemokine and Cannabinoid Systems in the Brain

Khalid Benamar, Ellen B. Geller, and Martin W. Adler

Cotinine Selectively Activates a Subpopulation of \(\alpha3/\alpha6\beta2^*\) Nicotinic Receptors in Monkey Striatum

Kathryn O’Leary, Neeraja Parameswaran, J. Michael McIntosh, and Maryka Quik

Diclofenac Attenuates the Regional Effect of \(\mbox{\textalpha}\)-Carrageenan on Blood-Brain Barrier Function and Cytoarchitecture

Tracy A. Brooks, Nicole Nametz, Rachael Charles, and Thomas P. Davis

Diclofenac Attenuates the Regional Effect of \(\mbox{\textalpha}\)-Carrageenan on Blood-Brain Barrier Function and Cytoarchitecture

Zhihua Xie, Susan V. Westmoreland, and Gregory M. Miller

First in Vivo Evidence for a Functional Interaction between Chemokine and Cannabinoid Systems in the Brain
