The Journal of Pharmacology and Experimental Therapeutics
A Publication of the American Society for Pharmacology and Experimental Therapeutics

Founded by John J. Abel - 1908

Rick G. Schnellmann, Editor
Craig C. Beeson, Assistant Editor

ASSOCIATE EDITORS

David S. Miller
Richard A. Morissett
A. Leslie Morrow
Michael J. O’Neill
Bryan L. Roth
Robert A. Roth
Roland Seifert
Kenneth D. Tew
Stephanie W. Watts
Alice M. Young

EDITORIAL ADVISORY BOARD

Theodore A. Slotkin

Bryan K. Yamamoto

BOARD OF PUBLICATIONS TRUSTEES

James E. Barrett, Chair; Jeffrey Conn, Ross Feldman, Lorraine J. Gudas, Eric F. Johnson, John S. Lazo, Edward T. Morgan, Richard R. Neubig, Rick G. Schnellmann, Darryle D. Schoep, and Mary Vore

Journals Director: Richard Dodenhoff

ASPET EXECUTIVE OFFICER: Christine K. Carrico
Managing Editor: Jill Filer
Senior Editorial Coordinator: David D. Williams

Journal and ASPET office: 9560 Rockville Pike, Bethesda, MD 20814-3995; telephone: 301-634-7060; fax: 301-634-7061; email: info@aspet.org; web site: www.aspet.org; journal web site: jpet.aspetjournals.org.

Editorial matters should be directed to Mr. Rick Schnellmann, Editor, The Journal of Pharmacology and Experimental Therapeutics, at the above address. The online version of The Journal of Pharmacology and Experimental Therapeutics contains all of the information and material contained in the print version plus is subject to changes that may not appear in print such as videos and large data sets. The online version may be more current than the print version. Where noted, the online version has been corrected in departure from the print version. The online version of The Journal of Pharmacology and Experimental Therapeutics officially published by the American Society for Pharmacology and Experimental Therapeutics is the definitive version and, to the extent any difference exists, will prevail over the print version.

Instructions to Authors: See jpet.aspetjournals.org for the Instructions to Authors and the ASPET Authorship Responsibility, Financial Disclosure, and Copyright Transfer form.

Subscriptions: Contact the ASPET Subscriptions Dept., 9560 Rockville Pike, Bethesda, MD 20814-3995; telephone: 301-634-7782; fax: 301-634-7061; email: subscriptions@aspet.org. For multi-site and consortia sales in Europe: Contact: David Charles, eLicensing, 92 avenue du General de Gaulle, 78600, Maisons-Laffitte, France; telephone: +33-1-39-12-29-29; fax: +33-1-39-12-47-45; email: dl.elicensing@organge.fr.

Change of address: ASPET must be notified 60 days in advance. Copies undeliverable because of incorrect address will be destroyed. Duplicate copies may be obtained, if available, from ASPET at the single copy price. Send address changes to the ASPET office.

Issue replacement policy: Domestic subscribers—Claims for nondelivery of issues must be made within six (6) months of issue mail date. Missing Issues (domestic and foreign)—ASPET will not honor refunds or replacement requests made outside of the claim time period. Up to two (2) issues will be replaced free of charge per subscription year.

Reprints in large quantities for commercial or academic use may be purchased from ASPET. For information and prices, call 301-634-7063.

Copyright information: The Journal of Pharmacology and Experimental Therapeutics is copyrighted by the American Society for Pharmacology and Experimental Therapeutics. For permission to photocopy or use material electronically from The Journal of Pharmacology and Experimental Therapeutics, see www.copyright.com or contact the Copyright Clearance Center (CCC), Inc., 222 Rosewood Dr., Danvers, MA 01923; telephone: 978-750-8400. Photocopying of articles beyond that permitted by Sections 107 and 108 of the U.S. Copyright Law is allowed, provided that the $20.00-per-copy fee is paid through the CCC. Classroom photocopying is permitted at no fee, provided that students are not charged more than the cost of duplication. This consent does not extend to other kinds of copying. Reproduction of any portion of an article for subsequent republication requires permission of ASPET. Write to the ASPET office at the above address. Requests should include a statement of intended use as well as explicit specifications of the materials to be reproduced.

Disclaimer: The statements and opinions contained in the articles of The Journal of Pharmacology and Experimental Therapeutics are solely those of the individual authors and contributors and not of the American Society for Pharmacology and Experimental Therapeutics. The appearance of advertisements in the journal is not a warranty, endorsement, or approval of the products or their safety. The American Society for Pharmacology and Experimental Therapeutics disclaims responsibility for any injury to persons or property resulting from any ideas or products referred to in any article or advertisement.

CENTENNIAL PERSPECTIVE

Peter B. Dews and Pharmacological Studies on Behavior

James E. Barrett and Jack Bergman

BEHAVIORAL PHARMACOLOGY

Olanzapine (LY170053, 2-Methyl-4-(4-methyl-1-piperazinyl)-10H-thieno[2,3-b][1,5] Benzodiazepine), but Not the Novel Atypical Antipsychotic ST2472 (9-Piperazin-1-ylpyrrolo[2,1-b][1,3]benzothiazepine), Chronic Administration Induces Weight Gain, Hyperphagia, and Metabolic Dysregulation in Mice

Roberto Coccurello, Antonio Caprioli, Roberto Conti, Orlando Ghirardi, Franco Borsini, Paolo Carminati, and Anna Moles

Morphine Deprivation Increases Self-Administration of the Fast- and Short-Acting μ-Opioid Receptor Agonist Remifentanil in the Rat

Ziva D. Cooper, Yen Nhu-Thi Truong, Yong-Gong Shi, and James H. Woods

Behavioral Pharmacology of the μ/δ Opioid Glycopeptide MMP2200 in Rhesus Monkeys

Gail Pereira Do Carmo, Robin Polt, Edward J. Bilsky, Kenner C. Rice, and S. Stevens Negus

CARdiovascular

A Long-Acting and Highly Selective Prostacyclin Receptor Agonist Prodrug, 2-[4-[(5,6-Diphenylpyrazin-2-yl)(isopropyl)amino]butoxy]-N-(methylsulfonyl)acetamide (NS-304), Ameliorates Rat Pulmonary Hypertension with Unique Relaxant Responses of Its Active Form, 4-[(5,6-Diphenylpyrazin-2-yl)(isopropyl)amino]butoxy)acetic Acid (MRE-269), on Rat Pulmonary Artery

Keiichi Kuwano, Asami Hashino, Kumiko Noda, Keiji Kosugi, and Kenji Kuwabara

meta-Iodobenzylguanidine, an Inhibitor of Arginine-Dependent Mono(ADP-ribosyl)ation, Prevents Neointimal Hyperplasia

Lorraine Yau, Peter Molnar, Michael C. Moon, Shelly Buhay, Jeffrey P. Werner, Katerina Molnar, Laura Saward, Dario Del Rizzo, and Peter Zahradka

Endothelin-1 Regulates Cardiac L-Type Calcium Channels via NAD(P)H Oxidase-Derived Superoxide

Qinghua Zeng, Qingwei Zhou, Fanrong Yao, Stephen T. O’Rourke, and Chengwen Sun

Cyclooxygenase 2-Selective and Nonselective Nonsteroidal Anti-Inflammatory Drugs Induce Oxidative Stress by Up-Regulating Vascular NADPH Oxidases

Huige Li, Marcus Hortmann, Andreas Daiber, Matthias Oelze, Mir Abolfazl Ostad, Petra M. Schwarz, Hui Xu, Ning Xia, Andrei L. Kleschov, Christian Mang, Ascan Warnholtz, Thomas Münzel, and Ulrich Förstermann
Vascular Protection with Candesartan after Experimental Acute Stroke in Hypertensive Rats: A Dose-Response Study

Wieslaw Kozak, Anna Kozak, Maribeth H. Johnson, Hazem F. Elewa, and Susan C. Fagan

Pharmacologic Inhibition of Site 1 Protease Activity Inhibits Sterol Regulatory Element-Binding Protein Processing and Reduces Lipogenic Enzyme Gene Expression and Lipid Synthesis in Cultured Cells and Experimental Animals

P2X7 Receptor Activation Amplifies Lipopolysaccharide-Induced Vascular Hyporeactivity via Interleukin-1β Release

Chin-Wei Chiao, Rita C. Tostes, and R. Clinton Webb

Cardioprotective Effect of Histamine H1-Receptor Activation: Pivotal Role of Gβγ-Dependent Inhibition of Voltage-Operated Ca2+ Channels

Christopher Morrey, Rima Estephan, Geoffrey W. Abbott, and Roberto Levi

Modulation of Sarcoplasmic Reticulum Function by PST2744 [Istaroxime; (E,Z)-3-((2-Aminoethoxy)imino) Androstane-6,17-dione Hydrochloride] in a Pressure-Overload Heart Failure Model

Marcella Rocchetti, Matteo Alemanni, Gaspare Mostacciuolo, Paolo Barassi, Claudia Altomare, Riccardo Chisci, Rosella Micheletti, Patrizia Ferrari, and Antonio Zaza

Isoflavone Attenuates Vascular Contraction through Inhibition of the RhoA/Rho-Kinase Signaling Pathway

Young Mi Seok, Inji Baek, Yong-Hoon Kim, Yeon-Shin Jeong, In-Jung Lee, Dong Hyun Shin, Young Hyun Hwang, and In Kyeom Kim

CELLULAR AND MOLECULAR

Circadian Variations in Rat Liver Gene Expression: Relationships to Drug Actions

Ligand-Specific Contribution of the N Terminus and E2-Loop to Pharmacological Properties of the Histamine H1-Receptor

Andrea Straßer, Hans-Joachim Wittmann, and Roland Seifert

The Glucosylceramide Synthase Inhibitor N-(5-Adamantane-1-yl-methoxy-pentyl)-deoxyojirimycin Induces Sterol Regulatory Element-Binding Protein-Regulated Gene Expression and Cholesterol Synthesis in HepG2 Cells

Nora Bijl, Saskia Scheij, Sander Houten, Rolf G. Boot, Albert K. Groen, and Johannes M. F. G. Aerts

Proinflammatory Effect of Sodium 4-Phenylbutyrate in F508-Cystic Fibrosis Transmembrane Conductance Regulator Lung Epithelial Cells: Involvement of Extracellular Signal-Regulated Protein Kinase 1/2 and c-Jun-NH2-Terminal Kinase Signaling

Telma Roque, Emilie Boncoeur, Vinciane Saint-Criq, Elise Bonvin, Annick Clement, Olivier Tabary, and Jacky Jacquot

Licofelone Suppresses Prostaglandin E2 Formation by Interference with the Inducible Microsomal Prostaglandin E2 Synthase-1

Andreas Koeberle, Ulf Siemoneit, Ulrike Bühring, Himak Northoff, Stefan Lauber, Wolfgang Albrecht, and Oliver Werz

GASTROINTESTINAL, HEPATIC, PULMONARY, AND RENAL

Phosphodiesterase Isozymes Involved in Regulation of HCO3 Secretion in Isolated Mouse Stomach in Vitro

Kazutomo Kita, Kento Takahashi, Yumi Ohashi, Hironori Takasuka, Eitaro Aihara, and Koji Takeuchi

Nociceptin/Orphanin FQ (N/OFQ) Peptide (NOP) Receptor Knockout Mice

Melissa A. Burmeister, Michael A. Ansonoff, John E. Pintar, and Daniel R. Kapusta

INFLAMMATION, IMMUNOPHARMACOLOGY, AND ASTHMA

MF63 [2-(6-Chloro-1H-phenanthro[9,10-d]imidazol-2-yl)-isophthalonitrile], a Selective Microsomal Prostaglandin E Synthase-1 Inhibitor, Relieves Pyresis and Pain in Preclinical Models of Inflammation

Daigen Xu, Steven E. Rowland, Patsy Clark, André Giroux, Bernard Côté, Sébastien Guiral, Myriam Salem, Yves Ducharme, Richard W. Friesen, Nathalie Méthot, Joseph Mancini, Laurent Audoly, and Denis Riedeau
METABOLISM, TRANSPORT, AND PHARMACOGENOMICS

The Protein Kinase A Pathway Contributes to Hg²⁺-Induced Alterations in Phosphorylation and Subcellular Distribution of Occludin Associated with Increased Tight Junction Permeability of Salivary Epithelial Cell Monolayers

The Role of Systemic Handling in the Pathophysiologic Actions of Botulinum Toxin

In Vitro Biliary Clearance of Angiotensin II Receptor Blockers and 3-Hydroxy-3-methylglutaryl-Coenzyme A Reductase Inhibitors in Sandwich-Cultured Rat Hepatocytes: Comparison with in Vivo Biliary Clearance

NEUROPHARMACOLOGY

Relationship of Spinal Dynorphin Neurons to δ-Opioid Receptors and Estrogen Receptor α: Anatomical Basis for Ovarian Sex Steroid Opioid Antinociception

Nobiletin, a Citrus Flavonoid, Improves Memory Impairment and Aβ Pathology in a Transgenic Mouse Model of Alzheimer’s Disease

Genomic Insights into Acute Alcohol Tolerance

In Vivo Profile of ICA-27243 [N-(6-Chloro-pyridin-3-yl)-3,4-difluoro-benzamide], a Potent and Selective KCNQ2/Q3 (Kv7.2/Kv7.3) Activator in Rodent Anticonvulsant Models

Lithium Protection of Phencyclidine-Induced Neurotoxicity in Developing Brain: The Role of Phosphatidylinositol-3 Kinase/Akt and Mitogen-Activated Protein Kinase/Extracellular Signal-Regulated Kinase Signaling Pathways

(R)-(5-tert-Butyl-2,3-dihydro-1H-inden-1-yl)-3-(1H-indazol-4-yl)-urea (ABT-102) Blocks Polymodal Activation of Transient Receptor Potential Vanilloid 1 Receptors in Vitro and Heat-Evoked Firing of Spinal Dorsal Horn Neurons in Vivo

Methanandamide Allosterically Inhibits in Vivo the Function of Peripheral Nicotinic Acetylcholine Receptors Containing the α7-Subunit

The Dopamine D3/D2 Agonist (+)-PD-128,907 [(R-)(+)-trans-3,4a,10b-Tetrahydro-4-propyl-2H,5H-[1]benzopyran[4,3-b]-1,4-oxazin-9-ol] Protects against Acute and Cocaine-Kindled Seizures in Mice: Further Evidence for the Involvement of D3 Receptors

Combination Therapy with Fenofibrate, a Peroxisome Proliferator-Activated Receptor α Agonist, and Simvastatin, a 3-Hydroxy-3-methylglutaryl-Coenzyme A Reductase Inhibitor, on Experimental Traumatic Brain Injury
TOXICOLOGY

p38 and c-Jun N-Terminal Kinase Mitogen-Activated Protein Kinase Signaling Pathways Play Distinct Roles in the Response of Organogenesis-Stage Embryos to a Teratogen

L-Methionine Toxicity in Freshly Isolated Mouse Hepatocytes Is Gender-Dependent and Mediated in Part by Transamination

Jin Yan and Barbara F. Hales 764
Joseph T. Dever and Adnan A. Elfarra 809

ERRATUM

Correction to “Antihyperalgesic Effects of (R,E)-N-(2-Hydroxy-2,3-dihydro-1H-inden-4-yl)-3-(2-(piperidin-1-yl)-4-(trifluoromethyl)phenyl)-acrylamide (AMG8562), a Novel Transient Receptor Potential Vanilloid Type 1 Modulator That Does Not Cause Hyperthermia in Rats” 999

Supplemental material is available online at http://jpet.aspetjournals.org.

About the cover: Double-stained skeletons of the fetuses exposed to saline (A, B, and F) or 600 mg/kg HU (C–E). See the article by Yan and Hales on page 764 of this issue.
Introducing our latest addition.
Our new Model 2006 has a 200 µl reservoir, 6 week duration at 0.15 µl/hr.

Test your hypotheses – not your research tools.
ALZET® pumps are proven technology; more than 10,000 published studies demonstrate their reliable use to deliver a wide range of test agents. We now offer 12 pump models designed to infuse from 1 day to 6 weeks in animals from small mice to large cattle. No batteries to fail or software to learn; use the peace of mind and extra time to design your next study.

With ALZET Catheters – test your drug’s effects nearly anywhere.
If you choose to use a catheter, such as for IV or targeted delivery, select from among 10 different ALZET catheters. Designed with your methods in mind, these catheters include features such as suture anchors and specially sized tips to streamline your surgeries. Connect a catheter to any ALZET pump and deliver the agent right to the target site. Determine whether your compound has the effect you predicted, while avoiding drug side effects that can result from systemic dosing.

Visit alzet.com for more information on our two newest pumps, or references in your area of interest. Or, contact us directly for more details by phone (877-922-5938) or e-mail (alzetcs@durect.com).
PLAN ON PUBLISHING IN THIS JOURNAL?...

Did you know?

ASPET Members get reduced rates on page charges when they publish in this journal. Members only pay $40/page instead of the standard $80/page.

ASPET Members get full free online access to five journals:

- Journal of Pharmacology & Experimental Therapeutics
- Pharmacological Reviews
- Drug Metabolism and Disposition
- Molecular Pharmacology
- Molecular Interventions

YOU CAN BE A MEMBER TOO!
JOIN ASPET TODAY AND RECEIVE ALL THESE BENEFITS PLUS MUCH MORE! VISIT US ONLINE AT:
