The Center for Memory and Learning, the Department of Molecular and Cellular Biology and the Department of Pharmacology at Baylor College of Medicine are jointly recruiting a tenure track Assistant or Associate Professor who utilizes the tools of contemporary molecular biology and/or pharmacology to investigate the fundamental mechanisms of learning and memory. Candidates who use animal models to study learning and memory and who have a record of accomplishment in the application of molecular/pharmacological and behavioral approaches are encouraged to apply. We encourage applications from candidates who have an interest in the development of pharmacological agents that alter cognition. Candidates should have a Ph.D. and/or M.D. and postdoctoral experience. The candidate will have primary faculty appointments in the two basic science departments and will be a member of the Center for Memory and Learning, with opportunities for affiliations with other departments and programs. The position will provide a competitive allowance for laboratory start-up and ongoing support. Please send curriculum vitae and statement of research interests electronically as a single PDF to lyndaa@bcm.tmc.edu. Please have hard copies of at least three letters of reference sent to: CML Search Committee, c/o Lynda Lynch, Department of Molecular and Cellular Biology, Baylor College of Medicine, One Baylor Plaza, BCM130, Houston, TX 77030 by February 15, 2008.

Baylor College of Medicine is an Equal Opportunity/Affirmative Action and Equal Access Employer.
