

The Journal of PHARMACOLOGY

And Experimental Therapeutics

A Publication of the American Society for Pharmacology and Experimental Therapeutics

February 2021

Vol. 376, No. 2

Contents

MINIREVIEW

- The Pharmacological Case for Cannabigerol 204
Rahul Nachmani, Wesley M. Raup-Konsavage, and Kent E. Vrana

CARDIOVASCULAR

- Specific Lowering of Asymmetric Dimethylarginine by Pharmacological Dimethylarginine Dimethylaminohydrolase Improves Endothelial Function, Reduces Blood Pressure and Ischemia-Reperfusion Injury 181
Young Lee, Purvi Mehrotra, David Basile, Mahbub Ullah, Arshnoor Singh, Nicholas Skill, Subhi Talal Younes, Jennifer Sasser, Anantha Shekhar, and Jaipal Singh
- Mast Cell Degranulation Increases Mouse Mast Cell Protease 4-Dependent Vasopressor Responses to Big Endothelin-1 But Not Angiotensin I 213
Laurence Vincent, Catherine Lapointe, Modou Lo, Hugo Gagnon, Gunnar Pejler, Shinji Takai, Robert Day, and Pedro D'Orléans-Juste
- Predictors of Early or Delayed Diastolic Dysfunction After Anthracycline-Based or Nonanthracycline Chemotherapy: A Pharmacological Appraisal 231
Giorgio Minotti, Pierantonio Menna, Massimiliano Camilli, Emanuela Salvatorelli, and Giorgio Reggiardo

CHEMOTHERAPY, ANTIBIOTICS, AND GENE THERAPY

- Lysosomal Biogenesis and Implications for Hydroxychloroquine Disposition 294
Keagan P. Collins, Sandra Witta, Jonathan W. Coy, Yi Pang, and Daniel L. Gustafson

ENDOCRINE AND DIABETES

- The Novel Phosphate and Bile Acid Sequestrant Polymer SAR442357 Delays Disease Progression in a Rat Model of Diabetic Nephropathy 190
Tamara R. Castañeda, María Méndez, Ian Davison, Ralf Elvert, Uwe Schwahn, Galina Boldina, Corinne Rocher, Petra Scherer, Kuldeep Singh, Dinesh S. Bangari, Mechthilde Falkenhahn, Aimo Kamt, Anish Konkar, Philip J. Larsen, Cynthia Arbeeney, Pradeep K. Dhal, and Thomas Hübschle

GASTROINTESTINAL, HEPATIC, PULMONARY, AND RENAL

- Increased Levels of Renal Lysophosphatidic Acid in Rodent Models with Renal Disease 240
Takashi Hirata, Stanley V. Smith, Teisuke Takahashi, Noriyuki Miyata, and Richard J. Roman
- Downregulation of the $\alpha v\beta 6$ Integrin via RGD Engagement Is Affinity and Time Dependent 273
James A. Roper, Alex L. Wilkinson, Elaine Gower, and Robert J. Slack
- Activation of the G Protein-Coupled Estrogen Receptor Prevented the Development of Acute Colitis by Protecting the Crypt Cell 281
Qian Wang, Zhao Li, Kaixuan Liu, Jianbo Liu, Shiquan Chai, Guanyu Chen, Shuyu Wen, Tian Ming, Jiayi Wang, Yuntao Ma, Honghui Zeng, Chuanyong Liu, and Bing Xue

INFLAMMATION, IMMUNOPHARMACOLOGY, AND ASTHMA

- ☐ Prostanoid Receptors of the EP₄-Subtype Mediate Gene Expression Changes in Human Airway Epithelial Cells with Potential Anti-Inflammatory Activity 161
Radhika Joshi, Omar Hamed, Dong Yan, Aubrey N. Michi, Mahmoud M. Mostafa, Shahina Wiehler, Robert Newton, and Mark A. Giembycz
- Fingolimod Phosphate (FTY720-P) Activates Protein Phosphatase 2A in Human Monocytes and Inhibits Monosodium Urate Crystal-Induced Interleukin-1 β Production 222
Marwa Qadri, Sandy ElSayed, and Khaled A. Elsaid
- ☐ Sphingosine 1-Phosphate Receptor Modulator ONO-4641 Regulates Trafficking of T Lymphocytes and Hematopoietic Stem Cells and Alleviates Immune-Mediated Aplastic Anemia in a Mouse Model 250
Takaki Komiya, Masashi Gohda, Hiroki Shioya, and Seishi Katsumata

METABOLISM, TRANSPORT, AND PHARMACOGENETICS

- ☐ Transport Properties of Statins by Organic Anion Transporting Polypeptide 1A2 and Regulation by Transforming Growth Factor- β Signaling in Human Endothelial Cells 148
Patrick T. Ronaldson, Hrvoje Brzica, Wazir Abdullahi, Bianca G. Reilly, and Thomas P. Davis
- ☐ Physiologically Based Pharmacokinetics of Lysosomotropic Chloroquine in Rat and Human 261
Xin Liu and William J. Jusko

NEUROPHARMACOLOGY

- ☐ Pharmacological Actions of Carbamate Insecticides at Mammalian Melatonin Receptors 306
Grant C. Glatfelter, Anthony J. Jones, Rajendram V. Rajnarayanan, and Margarita L. Dubocovich

☐ Supplemental material is available at jpet.aspetjournals.org.

About the cover: Baseline cardiovascular (CV) parameters or adjuvant treatments associate with an increased probability of diastolic dysfunction at 1 week or 6 months after chemotherapy. See the article by Minotti et al ([dx.doi.org/10.1124/jpet.120.000323](https://doi.org/10.1124/jpet.120.000323)).
