

CONTENTS

NUMBER 1, JANUARY, 1930

I. Cobalt as Vaso-Dilator. By J. M. Le Goff.....	1
II. The Effect of Certain Drugs on the Oxidation Processes of Mammalian Nerve Tissue. By M. A. F. Sherif.....	11
III. The Action of Some Heart Tonics. By Emil Leyko.....	31
IV. The Effect of Ammonium Chloride on the Development of Rigidity in Experimental Local Tetanus. By H. H. Dixon and S. V. Ranson.....	51
V. Biochemical Studies on the Absorption of the Ethylester of Paramethylphenyleinchoninic Acid (Tolysin) and Its Fate in Metabolism. I. The Absorption of Tolysin from the Intestinal Tract. By Otto Fürth and Erwin Kuh.....	57
VI. Biochemical Studies on the Absorption of the Ethylester of Paramethylphenyleinchoninic Acid (Tolysin) and Its Fate in Metabolism. II. The Fate of Tolysin in Metabolism and Its Toxicity. By Otto Fürth and Erwin Kuh.....	71
VII. Simultaneous Recording of Peristalsis and Action of the Pyloric Valve in the Isolated Stomach of the Frog. I. The Influence of Acidity and Basicity. By Jesse L. Serby and M. S. Dooley.....	85
VIII. Studies on Pupillary Reactions in Tetrapods. VI. The Mode of Action of Ergotamine. By Theodore Koppányi.....	101
IX. Studies on Pupillary Reactions in Tetrapods. VII. Sympathetic Actions of Cocaine, Procaine and Pilocarpine. By Theodore Koppányi... ..	113
X. Experimental and Clinical Studies of Ergotamine. I. Effect of Ergotamine on the Blood Sugar and Epinephrine Hyperglycemia in Trained, Unanesthetized Dogs. By John B. Youmans and W. H. Trimble.....	121
XI. Experimental and Clinical Studies of Ergotamine. II. The Effect of Ergotamine on the Heart Rate of Trained, Unanesthetized Dogs. By John B. Youmans and William H. Trimble.....	133

NUMBER 2, FEBRUARY, 1930

XII. The Pharmacological and Toxicological Actions of Acriflavine. By R. St. A. Heathcote and A. L. Urquhart.....	145
XIII. Toxicity of Lead Compounds. By Johannes S. Buck and Donald M. Kumro.....	161
XIV. The Action of the Toxin of <i>Crotalus adamanteus</i> on Blood Clotting. By Wyly McG. Billing.....	173
XV. An Artificial Heart. By O. S. Gibbs.....	197
XVI. Biochemical Studies of Mercury Compounds. I. The Effect of Acids, Bases, Salts and Blood Serum on the Diffusion of Mercury Compounds in Vitro. By F. H. L. Taylor and A. G. Young.....	217
XVII. The Liberation of Formaldehyde in the Aqueous Humour of the Eye after Administration of Hexamine (Urotropine). By M. A. F. Sherif..	231

- XVIII. The Estimation of Small Quantities of Strychnine in Biologic Material. By James T. Priestley..... 241

NUMBER 3, MARCH, 1930

- XIX. Effects of Pure Nitrous Oxide Anesthesia on Human Blood Pressure. By Samson Wright and J. H. Thompson..... 247
- XX. The Pharmacology of Xysmalobinum. By J. M. Watt..... 261
- XXI. The Toxic Effects of Irradiated Ergosterol. By J. C. Hoyle..... 271
- XXII. Some Effects of Alcohol upon the Normal and Damaged Liver. By Sandford M. Rosenthal..... 291
- XXIII. Studies in Blood Composition of Animals under Pathological Conditions. II. Experiments with Lupines. By A. A. Horvath..... 303
- XXIV. Investigation of Insulin-like Properties of Uvursin, Oxycatalyst, and Solanum Sanitwongsei Berries. By M. Louisa Long and Fritz Bischoff.. 313
- XXV. II. The Action of Ephedrine, Pseudoephedrine and Epinephrine on the Bronchiolar Muscle of the Isolated Lung. By Edward E. Swanson and Robert K. Webster..... 327
- XXVI. Magnesium Oxide as an Aid to the Antipyretic Action of Phenacetin in Dogs. By J. E. Winter, C. H. Richey and H. G. Barbour..... 343

NUMBER 4, APRIL, 1930

- XXVII. Growth and Bone Changes in Rats Injected with Anterior Pituitary Extract. By Milton B. Handelsman and Ernest F. Gordon..... 349
- XXVIII. The Effect of Hypertonic Solutions of Sodium Arabinatate on the Cerebrospinal Fluid Pressure. By Joseph Hughes and Louis Laplace.. 363
- XXIX. The Potassium and Calcium Content of the Brain under $MgSO_4$ Anesthesia. By W. E. Callison, J. Lander, and F. P. Underhill..... 385
- XXX. Further Studies on the Effect of Morphine Sulphate, Atropine Sulphate, and Hyoscine Hydrobromide upon the Intact Intestine in Unanesthetized Dogs. By C. M. Gruber, W. W. Greene, C. S. Drayer and W. M. Crawford..... 389
- XXXI. Further Observations on the Effect of Pituitary Extract and Morphine Sulphate upon Excised Dog's Intestine. By Charles M. Gruber and Garrett Pipkin..... 401
- XXXII. Studies on the Colloid Chemistry of Antisepsis and Chemotherapy. I. The Mode of Combination of Antiseptic Dyes with Proteins. By Arthur D. Hirschfelder and Harold N. Wright..... 411
- XXXIII. Studies on the Colloid Chemistry of Antisepsis and Chemotherapy. II. Does the Fraction of an Antiseptic Which Has Been Adsorbed on Protein Still Exert an Antiseptic Action? By Harold N. Wright and Arthur D. Hirschfelder..... 433
- XXXIV. On the Immediate Anti-diuretic Action of Pituitary Extract. By James B. Ross and R. L. Stehle..... 451
- XXXV. The Cardiac Action of Pituitary Extract (Posterior Lobe). By Jas. B. Ross, N. B. Dreyer and R. L. Stehle with the coöperation of O. S. Gibbs..... 461
- XXXVI. The Action of Pituitary Extract upon Blood Pressure. By B. B. Raginsky, James B. Ross and R. L. Stehle..... 473
- XXXVII. Index..... 481

ILLUSTRATIONS

Record of the blood pressure. $\times \frac{1}{4}$. Rabbit 3 kgm. Morphin anesthesia (Fig. 1).....	8
Showing the effect of novocaine borate 2 per cent solution on oxygen uptake (Fig. 1).....	17
Effect of novocaine borate 0.5 per cent solution on oxygen uptake (Fig. 2)...	18
— of cocaine hydrochloride 1 per cent solution on oxygen uptake (Fig. 3)...	18
— of cocaine hydrochloride 0.5 per cent solution on oxygen uptake (Fig. 4)...	19
— of cocaine hydrochloride 0.2 per cent solution on oxygen uptake (Fig. 5)...	20
— of urethane 5 per cent solution on oxygen uptake (Fig. 6).....	21
— of urethane 2.5 per cent on oxygen uptake (Fig. 7).....	22
— of caffeine citrate 0.1 per cent solution on oxygen uptake (Fig. 8).....	23
— of caffeine citrate 1 per cent solution on oxygen uptake (Fig. 9).....	24
— of eucupinotoxin 0.2 per cent on oxygen uptake (Fig. 10).....	25
— of galactose 0.1 per cent solution on oxygen uptake by isolated nerve (Fig. 11).....	26
Cardiazol (Fig. 1).....	34
Coramine (Fig. 2).....	37
— (Fig. 3).....	37
Hexetone (Fig. 4).....	39
— (Fig. 5).....	40
Adrenaline-ephedrine (Fig. 6).....	43
—ephetonine (Fig. 7).....	44
Shows apparatus used, except for lower part of drop recorder (Fig. 1).....	88
A condensed record (1 to 7) of a single experiment, illustrating both acid and alkali effects (Fig. 2).....	91
Simultaneous recording of peristalsis and action of the pyloric valve in the isolated stomach of the frog. I. The influence of acidity and basicity (Fig. 3).....	95
Effect of ergotamine on the blood sugar: curves showing a rise and a fall in Normal unanesthetized dogs (Fig. 1).....	127
— of ergotamine on the hyperglycemic response to an injection of epinephrine in a normal dog (Fig. 2).....	128
— of ergotamine on the epinephrine hyperglycemia of a normal dog (Fig. 3).....	129
Tracing from isolated toad's heart, perfused with acriflavine, 1:250,000 (Fig. 1).....	147
— from isolated intestine of rabbit (Fig. 2).....	149
Blood pressure tracing from anesthetised dog (Fig. 3).....	150
Section of kidney, under $\frac{1}{4}$ -inch objective, showing typical dilation of the tubules and the atrophy of the epithelium (Fig. 4).....	156
— of spleen, under $\frac{1}{4}$ -inch objective, showing a portion of one of the trabeculae and the adjoining splenic pulp (Fig. 5).....	156

Section of liver, under $\frac{1}{4}$ -inch objective, showing an area in which the liver cells are shrunken and atrophied (Fig. 6).....	157
An artificial heart (Fig. 1).....	200
— artificial heart (Fig. 2).....	200
— artificial heart (Fig. 3).....	201
Photograph of the instrument in place on a cat (Fig. 4).....	202
An artificial heart (Fig. 5).....	203
Shows the effect of commercial pituitrin (Fig. 6).....	209
— the effect of 0.5 mgm. ergotoxin (Fig. 7).....	209
— the effect of adrenalin (1 drop 1:1000) on a circulation in which reversal is probably complete (Fig. 8).....	210
— a typical adrenalin reaction (Fig. 9).....	210
— the typical result of a vaso-depressor (Fig. 10).....	212
Biochemical studies of mercury compounds (Fig. 1).....	221
— studies of mercury compounds (Fig. 2).....	221
Apparatus for the determination of pH in gas mixture (Fig. 1).....	233
Effects of pure nitrous oxide anesthesia on human blood pressure (Fig. 1).....	248
— of pure nitrous oxide anesthesia on human blood pressure (Fig. 2).....	249
— of pure nitrous oxide anesthesia on human blood pressure (Fig. 3).....	251
— of pure nitrous oxide anesthesia on human blood pressure (Fig. 4).....	252
— of pure nitrous oxide anesthesia on human blood pressure (Fig. 5).....	254
— of pure nitrous oxide anesthesia on human blood pressure (Figs. 6 and 7).....	255
— of pure nitrous oxide anesthesia on human blood pressure (Fig. 8).....	256
— of pure nitrous oxide anesthesia on human blood pressure (Figs. 9A and 9B).....	257
Pharmacology of Xysmalobinum (Figs. 1 and 2).....	264
— of Xysmalobinum (Fig. 3).....	265
— of Xysmalobinum (Fig. 4).....	266
— of Xysmalobinum (Fig. 5).....	267
Toxic effects of irradiated ergosterol (Fig. 1).....	273
Section of thoracic aorta of rat 5 (Fig. 2).....	276
— of thoracic aorta of rat 5 (Fig. 3).....	277
— of myocardium of rat 8 (Fig. 4).....	277
— of myocardium of rat 8, showing the wall of a small arteriole completely replaced by calcium deposit (Fig. 5).....	277
— of kidney of rat 8, showing much calcium deposit at the junction of medulla and papilla (Fig. 6).....	277
Toxic effects of irradiated ergosterol (Fig. 7).....	279
— effects of irradiated ergosterol (Fig. 8).....	282
Effect of 2 cc. alcohol per kilogram on normal dogs (Chart 1).....	293
— of 4 cc. alcohol per kilogram on the phenoltetrachlorphthalein test in normal dogs (Chart 2).....	293
Effects of alcohol on the normal and damaged liver (Chart 3).....	294
Alcohol on normal and damaged liver (Chart 4).....	296
— on normal and damaged liver (Chart 5).....	297
— on normal and damaged (with CCl_4) liver (Chart 6).....	298
— on normal and CCl_4 damaged liver (Chart 7).....	299

Representing the perfused isolated lungs of a rabbit, female, weight 1.75 kgm. (Chart 1).....	333
— the perfused isolated lungs of a cat, male, weight 2.200 kgm. (Chart 2)....	334
— the perfused isolated lungs of a cat, male, weight 1.8 kgm. (Chart 3).....	335
— the perfused isolated lungs of a dog, female, weight 6.5 kgm. (Chart 4)..	336
— the perfused isolated lungs of a cat, male, weight 1.9 kgm. (Chart 5)...	337
Antipyretic effects of phenacetin 200 mgm. per kilogram plus magnesium 100 mgm. per kilogram (heavy lines and circles) compared with phenacetin alone (light lines) (Figs. 1 to 6).....	345
— effects of phenacetin alone (Fig. 7).....	346
Average growth results in a cage of eight rats, 4 of which received 0.5 cc. of the alkaline pituitary extract twice daily for thirteen days (Curve A)..	355
— growth results in a cage of eight rats, 4 of which received 0.5 cc. of the alkaline pituitary extract twice daily for thirteen days (Curve B).....	355
Medial aspect of the mandible from the same animal as in figure 2 (Fig. 1)...	358
— aspect of the mandible from the same animal as in figure 1 (Fig. 2).....	358
Lateral aspect of the mandible of an experimental rat weighing 215 grams at the onset of the experiment. 0.5 cc. of alkaline pituitary extract was ad- ministered twice daily for two weeks, with madder included in its diet throughout this period (Fig. 3).....	358
— aspect of the mandible of an untreated control animal, weighing 215 grams after ingesting madder for two weeks (Fig. 4).....	358
Dialysis of cerebrospinal fluid against glucose and sodium arabinat through collodion sacs (Fig 1).....	369
Experiment 28. (Dog 979, weight 8.5 kgm. Amytal anesthesia.) Effect of 27 per cent solution sodium arabinat (2.3 cc. per kilogram) on cerebro- spinal fluid pressure and blood pressure (Fig. 2).....	372
— 40. (Dog 760, weight 10 kgm. Colonic ether anesthesia.) (Time, 6 seconds.) Effect of 25 per cent solution sodium arabinat (2.5 cc. per kilogram) on cerebrospinal fluid pressure, blood pressure, and respiration (Fig. 3).....	373
— 40. (Dog 760, weight 10 kgm. Colonic ether anesthesia.) (Time, 6 sec- onds.) Effect of 50 per cent glucose (2.5 cc. per kilogram) (Fig. 4).....	375
— 38. (Dog 762, weight 12 kgm. Amytal anesthesia.) Effect of sodium arabinat (1.7 cc. per kilogram 25 per cent solution) on blood and cere- brospinal fluid pressures (Fig. 5).....	376
— 10. (Dog 5, weight 7 kgm. Amytal anesthesia.) Effect of ammonium arabinat (2.8 cc. per kilogram 25 per cent solution) on cerebrospinal pressure (Fig. 6).....	378
— 14. (Dog 827, weight 4.5 kgm. Amytal anesthesia.) Effect of am- monium arabinat (2.6 cc. per kilogram 25 per cent solution) on cerebro- spinal pressure (Fig. 7).....	379
— 23. (Dog 365, weight 17.9 kgm. Amytal anesthesia.) Effect of sodium arabinat (2.2 cc. per kilogram 25 per cent solution) on cerebrospinal pressure (Fig. 8).....	380
— 26. (Dog 962, weight 6.8 kgm. Amytal anesthesia.) Effect of sodium arabinat (2.9 cc. per kilogram 25 per cent solution) on cerebrospinal pressure (Fig. 9).....	381

Experiment 36. (Dog 6, weight 6.7 kgm. Amytal anesthesia.) Effect of sodium arabinatate (2.9 cc. per kilogram 25 per cent solution) on blood pressure and increased cerebrospinal pressure (Fig. 10).....	382
Unanesthetized 10 kgm. dog, intact intestine (Fig. 1).....	392
— 10 kgm. dog (Fig. 2).....	393
14 kgm. dog. Unanesthetized (Fig. 3).....	394
9.5 kgm. dog. Unanesthetized (Fig. 4).....	396
Unanesthetized 14.2 kgm. dog (Fig. 5).....	397
14 kgm. dog. Unanesthetized (Fig. 6).....	399
Longitudinal segment of normal intestine (Fig. 1).....	403
— segment of normal intestine (Fig. 2).....	404
— segment of normal intestine (Fig. 3).....	406
— segment of normal intestine (Fig. 4).....	407
Excised longitudinal segment from a Thiry-Vella loop of dog's intestine (Fig. 5).....	408
Segment from a Thiry-Vella loop of dog's intestine (Fig. 6).....	409
Types of chemical and physico-chemical reaction (Fig. 1).....	416
Binding of crystal violet, gentian violet and rose bengal by coagulated egg albumin (Fig. 2).....	420
Retarding effect of 0.5 per cent egg albumin on rate of dialysis of mercurochrome (Fig. 3).....	421
Diagrammatic representation of probable effect of concentration of a protein upon its free surface (Fig. 4).....	424
Application of Freundlich absorption isotherm equation to binding of triphenyl methane dyes by egg albumin (Fig. 5).....	427
Structural formulas of triphenyl methane dyes (Fig. 6).....	428
Binding of crystal violet and malachite green by 1 per cent egg albumin (Fig. 1).....	442
Effect of 1 per cent egg albumin in decreasing the antiseptic efficiency of crystal violet (Fig. 2).....	443
— of 1 per cent egg albumin in decreasing the antiseptic efficiency of malachite green (Fig. 3).....	444
Lag phase in antiseptic action of basic fuchsin (Fig. 4).....	447
On the immediate anti-diuretic action of pituitary extract (Fig. 1).....	457
— the immediate anti-diuretic action of pituitary extract (Fig. 2).....	457
— the immediate anti-diuretic action of pituitary extract (Fig. 3).....	457
The cardiac action of pituitary extract (posterior lobe) (Fig. 1).....	466
— cardiac action of pituitary extract (posterior lobe) (Fig. 2).....	466
— cardiac action of pituitary extract (posterior lobe) (Fig. 3).....	467
— cardiac action of pituitary extract (posterior lobe) (Fig. 4).....	468
— cardiac action of pituitary extract (posterior lobe) (Fig. 5).....	469
— cardiac action of pituitary extract (posterior lobe) (Fig. 6).....	470
— action of pituitary extract upon blood pressure (Figs. 1-4).....	476
— action of pituitary extract upon blood pressure (Figs. 5-8).....	477
— action of pituitary extract upon blood pressure (Figs. 9-12).....	478
