

# The Journal of PHARMACOLOGY

## And Experimental Therapeutics

A Publication of the American Society for Pharmacology and Experimental Therapeutics

October 2024

Vol. 391, No. 1

### Contents

#### VIEWPOINT

Methocinnamox is a Potent and Long-Acting Antagonist that can Prevent and Reverse Opioid-Induced Respiratory Depression 1  
*James A. Carr and Daniel J. Morgan*

Comparison of the  $\mu$ -Opioid Receptor Antagonists Methocinnamox and Naloxone to Reverse and Prevent the Ventilatory Depressant Effects of Fentanyl, Carfentanil, 3-Methylfentanyl, and Heroin in Male Rats 4  
*Takato Hiranita, Nicholas P. Ho, and Charles P. France*

#### VIEWPOINT

A "Furious" Effort to Develop Novel 3,4-Methylenedioxyamphetamine-Like Therapeutics 18  
*William E. Fantegrossi and Brenda M. Gannon*

Novel Benzofuran Derivatives Induce Monoamine Release and Substitute for the Discriminative Stimulus Effects of 3,4-Methylenedioxyamphetamine 22  
*Candace B. Johnson, Donna Walther, Matthew J. Baggott, Lisa E. Baker, and Michael H. Baumann*

#### BEHAVIORAL PHARMACOLOGY

The Effects of Eating a Traditional High Fat/High Carbohydrate or a Ketogenic Diet on Sensitivity of Female Rats to Morphine 30  
*Nina M. Beltran, Alyssa N. Parra, Ana Paulina Serrano, Jazmin Castillo, Isabella M. Castro, Madeline K. Elsey, Vanessa Minervini, and Katherine M. Serafine*

#### CARDIOVASCULAR

Effect of Vascular Senescence on the Efficacy and Safety of Warfarin: Insights from Rat Models and a Prospective Cohort Study 39  
*Haobin Li, Jing Liu, Qing Liang, Yan Yu, and Guangchun Sun*

#### GASTROINTESTINAL, HEPATIC, PULMONARY, AND RENAL

Aloperine Attenuates Hepatic Ischemia/Reperfusion-Induced Liver Injury via STAT-3 Signaling in a Murine Model 51  
*Shichao Wei, Junshen Xiao, Feng Ju, Jiayue Li, Ting Liu, and Zhaoyang Hu*

#### INFLAMMATION, IMMUNOPHARMACOLOGY, AND ASTHMA

Comparison of the Genomic Activity of an EP<sub>4</sub>-Receptor and  $\beta_2$ -Adrenoceptor Agonist in BEAS-2B Human Bronchial Epithelial Cells: In Search of Compartmentalized, cAMP-Dependent Gene Expression 64  
*Radhika Joshi, Tamkeen U. Paracha, Mahmoud M. Mostafa, Andrew J. Thorne, Varuna Jayasinghe, Dong Yan, Omar Hamed, Robert Newton, and Mark A. Giembycz*

Supplemental material is available at [jpet.aspetjournals.org](http://jpet.aspetjournals.org).

About the cover: Ontology of ONO-AE1-329-regulated genes. See the article by Joshi et al. ([dx.doi.org/10.1124/jpet.124.002226](https://doi.org/10.1124/jpet.124.002226)).

## METABOLISM, TRANSPORT, AND PHARMACOGENETICS

- ☐ Dysregulation of Human Hepatic Drug Transporters by Proinflammatory Cytokines 82  
*Tianran Hao, Yik Pui Tsang, Mengyue Yin, Qingcheng Mao, and Jashvant D. Unadkat*
- ☐ Lenacapavir Exhibits Atropisomerism—Mechanistic Pharmacokinetics and Disposition Studies of Lenacapavir Reveal Intestinal Excretion as a Major Clearance Pathway 91  
*Jim Zheng, Bing Lu, Gavin Carr, Judy Mwangi, Kelly Wang, Jia Hao, Kelly McLennan Staiger, Nathan Kozon, Bernard P. Murray, Mohammad Bashir, Mark A. Gohdes, Winston C. Tse, Scott Schroeder, Michael Graupe, John O. Link, Jungjoo Yoon, Anna Chiu, William Rowe, Bill J. Smith, and Raju Subramanian*

## NEUROPHARMACOLOGY

- ☐ Levetiracetam Prevents Neurophysiological Changes and Preserves Cognitive Function in the Human Immunodeficiency Virus (HIV)-1 Transactivator of Transcription Transgenic Mouse Model of HIV-Associated Neurocognitive Disorder 104  
*Ashley N. Ewens, Alexander Pilski, Shayne D. Hastings, Chris Krook-Magnuson, Steven M. Graves, Esther Krook-Magnuson, and Stanley A. Thayer*

## TOXICOLOGY

- ☐ Primaquine-5,6-Orthoquinone Is Directly Hemolytic to Older G6PD Deficient RBCs in a Humanized Mouse Model 119  
*Karolina H. Dziejulska-Cronk, Julie A. Reisz, Ariel M. Hay, Travis Nemkov, Francesca I. Cendali, Aaron Issaian, Derek R. Lamb, Mitasha S. Palha, Eric A. Legenzov, Joseph P.Y. Kao, Larry A. Walker, Babu L. Tekwani, Paul W. Buehler, Angelo D'Alessandro, and James C. Zimring*

## ERRATUM

- Correction to “Comments on: Increasing Enzyme Mannose-6-Phosphate Levels but Not Miglustat Coadministration Enhances the Efficacy of Enzyme Replacement Therapy in Pompe Mice” 130
