

## CONTENTS

## NUMBER 1, JANUARY, 1932

|  |     |
|--|-----|
| I. Walter Ernest Dixon.....  | 3   |
| II. The Distribution of Chlorides and Iodides in the Skin and Muscles of the Rabbit after Administration of Potassium Iodide. By Harold A. Shoemaker and Frank P. Underhill..... | 23  |
| III. Can Iodides Replace Chlorides in Chloride Deficiency? By Harold A. Shoemaker and Frank P. Underhill.....  | 43  |
| IV. Study of Pituitary Hormones. IV. Relation Between Hypophysis Hormones and Vitamine C. By R. T. Agnoli.....   | 47  |
| V. Studies on Hypophysis Hormones. V. Influence of Pituitary Hormones on the Germination of Seeds of <i>Lupinus albus</i> L. By R. T. Agnoli.....                                | 55  |
| VI. Sulfonium Compounds and the Autonomic Nervous System. By Reid Hunt and R. R. Renshaw.....  | 63  |
| VII. The Pharmacology of Inflammation. II. The Inhibiting Effect of Some Benzoates. By A. I. Bernheim, L. Hirschhorn and M. G. Mulinos.....                                      | 81  |
| VIII. The Action of Physostigmine. With Special Reference to the Circulatory System and the Intestine. By Reginald St. A. Heathcote.....   | 95  |
| IX. The General Properties, Actions and Toxicity of Propylene Glycol. By M. A. Seidenfeld and P. J. Hanzlik.....   | 109 |

## NUMBER 2, FEBRUARY, 1932

|  |     |
|--|-----|
| X. A Contribution to the Pharmacology of Pseudomorphine. By Janet Travell.....   | 123 |
| XI. Thio and Thiomethyl-ammonium Compounds. By Reid Hunt and R. R. Renshaw.....  | 151 |
| XII. The Action of Arsenic on Leaves. By I. A. Parfentjev and W. K. Devrient.....  | 171 |
| XIII. An Experimental Investigation on the Treatment of Toxaemia. Part I. By G. Norman Myers.....  | 191 |
| XIV. A Study of the Cardiovascular Responses in Man to the Intravenous and Intra-arterial Injection of Acetylcholine. By Laurence B. Ellis and Soma Weiss..... | 235 |
| XV. Claude Bernard's Theory of Narcosis. By V. E. Henderson and G. H. W. Lucas.....  | 253 |

## NUMBER 3, MARCH, 1932

|  |     |
|--|-----|
| XVI. The Effect of Radon Radiation upon Isolated Organs. By S. E. F. Gooding.....                              | 269 |
| XVII. Combined Ephedrine-pituitary Extract (Posterior Lobe) Therapy in Histamine Shock. By K. I. Melville..... | 279 |

|   |     |
|---|-----|
| XVIII. The Effect of Ultraviolet Irradiation upon the Toxicity of Pure Nicotine. By Glen Wakeham and George P. Tracy.....   | 295 |
| XIX. Rôle of Chemical Structure of Cocaine in the Cocaine Sensitization-desensitization Phenomena. By S. K. Wirt and M. L. Tainter.....                             | 299 |
| XX. Blood Alcohol and Its Relation to Intoxication. By R. G. Turner. Assisted by E. R. Loew.....  | 305 |
| XXI. The Duration of Action of the Barbituric Acid Hypnotics as a Basis of Classification. By Richard H. Fitch and Arthur L. Tatum.....                             | 325 |
| XXII. Picrotoxin as an Antidote in Acute Poisoning by the Longer Acting Barbiturates. By A. H. Maloney and A. L. Tatum.....   | 337 |
| XXIII. Slowing of the Heart Rate, Due to Irradiated Synephrin, Epinephrine, Nicotine and Related Drugs. By John A. Higgins, Paul L. Ewing and Hugh A. McGuigan..... | 353 |
| XXIV. The Estimation of the Relative Toxicities and Efficiencies of Local Anesthetics. By A. D. Macdonald and M. C. G. Israëls.....                                 | 359 |
| XXV. The Effect of Ergotamine on the Intestine with Observations on the Influence of Calcium on Its Action. By William Salant and William M. Parkins.....           | 369 |

## NUMBER 4, APRIL, 1932

|  |     |
|--|-----|
| XXVI. The Influence of Sodium Phenobarbital (Sodium Luminal) on the Cardiac Action of Pituitary Extract. By B. B. Ragsinsky and R. L. Stehle.....  | 385 |
| XXVII. A Note Referring to the Paper of Frank Wokes: A Method of Comparing the Absorption of Calcium Preparations. By L. Kofler and R. Fischer.....  | 393 |
| XXVIII. Remarks on the Preceding Note. By F. Wokes.....  | 395 |
| XXIX. The Amide Nitrogen of Blood. VI. A Reply to Nash and Williams. By Sidney Bliss.....  | 397 |
| XXX. The Toxic Action of p-Diazoiminobenzene Hydrochloride and of Its Additive Compound with Cupric Chloride. By A. C. White.....  | 409 |
| XXXI. Studies on the Pharmacology of Metaphen and Acriflavine. By P. Jeanette Crittenden.....  | 423 |
| XXXII. The Effect of Phosphate and Bicarbonate Buffers on the Ionization of Calcium Salts in Physiologic Salt Solutions. By W. F. von Oettingen and R. E. Pickett.....                       | 435 |
| XXXIII. Chemotherapy of Quinoline Compounds. III. The Action of Certain Quinoline Compounds on Paramoecia. By Phanindranath Brahmachari, Upendranath Brahmachari and Radhakrishna Banerjee.. | 445 |
| XXXIV. Further Studies of the Control of Experimentally Produced Convulsions. By Haddow M. Keith.....  | 449 |
| XXXV. The Stimulant Action of Nicotine upon the Spleen. By F. D. McCrea.....   | 457 |
| XXXVI. On the Pharmacologic Action of Some New Choline Derivatives in Relation to Their Chemical Constitution. By W. F. von Oettingen and D. F. Eveleth.....                                 | 465 |
| XXXVII. The Intact Intestine in Non-anesthetized Dogs as Affected by Anthraquinon (Emodin) Cathartics. By Charles M. Gruber, William T. K. Bryan and Lyman K. Richardson.....                | 479 |

## ILLUSTRATIONS

|  |     |
|--|-----|
| Study of pituitary hormones. IV. Relation between hypophysis hormones and vitamine C (Fig. 1).....   | 50  |
| — of pituitary hormones. IV. Relation between hypophysis hormones and vitamine C (Fig. 2).....   | 50  |
| — of pituitary hormones. IV. Relation between hypophysis hormones and vitamine C (Fig. 3).....   | 51  |
| — of pituitary hormones. IV. Relation between hypophysis hormones and vitamine C (Fig. 4).....   | 51  |
| — of pituitary hormones. IV. Relation between hypophysis hormones and vitamine C (Fig. 5).....   | 52  |
| Isolated toad heart (Fig. 1).....  | 100 |
| — rabbit heart (Fig. 2).....   | 102 |
| Atropinized anaesthetised dog, previously treated with ergotoxine (Fig. 3) ..  | 105 |
| Anaesthetised dog (Fig. 4).....  | 106 |
| Effects of continued drinking of different concentrations of propylene glycol by white rats (Fig. 1).....  | 118 |
| Effect of pseudomorphine, initial injection of 0.1 mgm., on respiration (A) and carotid blood pressure (B) (Fig. 1).....   | 137 |
| — of pseudomorphine, 0.5 mgm., on respiration (A) and carotid blood pressure (B) (Fig. 2).....   | 137 |
| — of pseudomorphine, second dose of 0.5 mgm., on respiration (A) and carotid blood pressure (B) (Fig. 3).....  | 138 |
| — of pseudomorphine, 10.0 mgm., on respiration (A) and carotid blood pressure (B) (Fig. 4).....  | 138 |
| — of epinephrine, 1:10,000 solution, 0.15 cc., on respiration (A) and carotid blood pressure (B), before pseudomorphine (Fig. 5).....  | 140 |
| — of pseudomorphine, 0.1 mgm., and of epinephrine, 1:10,000 solution, 0.15 cc., injected fifty-five seconds later, on respiration (A) and carotid blood pressure (B) (Fig. 6)..... | 140 |
| — of epinephrine, 1:10,000 solution, 0.15 cc., given two minutes after the injection of pseudomorphine, 0.5 mgm., on respiration (A) and carotid blood pressure (B) (Fig. 7).....  | 141 |
| — of pseudomorphine, 5.0 mgm., on respiration (A) and carotid blood pressure (B) (Fig. 8).....   | 141 |
| An experimental investigation on the treatment of toxaemia (Graph 1).....  | 221 |
| — experimental investigation on the treatment of toxaemia (Graph 2).....   | 222 |
| — experimental investigation on the treatment of toxaemia (Graph 3) ..   | 223 |
| Skin temperature measurements over the cheek in three subjects before, during and after the intravenous injection of 0.08 gram per minute of acetylcholine (Chart 1).....          | 239 |

|  |     |
|--|-----|
| The effect of the intravenous injection of varying dosages of acetylcholine on the pulse rates of thirteen normal subjects (Chart 2) .....             | 240 |
| — effect of the intravenous injection of varying dosages of acetylcholine on the arterial blood pressures of thirteen normal subjects (Chart 3).....   | 241 |
| Skin temperature measurements over the thigh in four normal subjects before, during and after the intra-arterial injection of acetylcholine (Chart 4). | 244 |
| Record of isolated and perfused heart of tortoise (Fig. 1).....  | 271 |
| — of perfused frog's heart (Fig. 2).....   | 272 |
| — of isolated rabbit's intestine (Fig. 3).....   | 273 |
| — of isolated guinea pig's uterus (Fig. 4).....  | 274 |
| — of movements of isolated guinea pig's uterus (Fig. 5).....   | 275 |
| — of movements of isolated guinea pig's uterus in Locke Ringer's solution (Fig. 6).....  | 276 |
| Respiration and blood pressure tracings. Time recorded in minutes. Dog, female, 7.2 kgm. Operative procedures under ether anaesthesia (Fig. 1).        | 282 |
| — and blood pressure tracings. Time recorded in minutes. Dog, female, 10.9 kgm. Operative procedures under ether anaesthesia (Fig. 2).....             | 283 |
| — and blood pressure tracings. Time recorded in minutes. Dog, female, 5 kgm. Operative procedures under ether anaesthesia (Fig. 3).....                | 283 |
| Blood pressure tracing. Time recorded in minutes. Dog, female, 5.8 kgm. Operative procedures under ether anaesthesia (Fig. 4).....                     | 284 |
| Respiration and blood pressure tracings. Time recorded in minutes. Dog, male, 6.1 kgm. Operative procedures under ether anaesthesia (Fig. 5).....      | 284 |
| — and blood pressure tracings. Time recorded in minutes. Dog, male, 9 kgm. Operative procedures under ether anaesthesia (Fig. 6).....                  | 285 |
| — and blood pressure tracings. Time recorded in minutes. Dog, female, 6.4 kgm. Operative procedures under ether anaesthesia (Fig. 7).....              | 286 |
| — and blood pressure tracings. Time recorded in minutes. Dog, female, 5.4 kgm. Operative procedures under ether anaesthesia (Fig. 8).....              | 287 |
| Blood pressure tracing. Time recorded in minutes. Dog, female, 7.5 kgm. Operative procedures under ether anaesthesia (Fig. 9).....                     | 288 |
| Alcohol absorption in fasting dogs. Ingestion of 10 per cent solution. Alcohol given in one dose (Fig. 1).....   | 315 |
| — absorption in dogs one-half hour after feeding. Ingestion of 10 per cent solution. Alcohol given in one dose (Fig. 2).....                           | 315 |
| Slowing of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 1).....  | 354 |
| — of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 2).....  | 354 |
| — of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 3).....  | 355 |
| — of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 4).....  | 356 |
| — of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 5).....  | 356 |
| — of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 6).....  | 357 |

|   |     |
|---|-----|
| Slowing of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 7) .....                      | 357 |
| — of the heart rate, due to irradiated synephrin, epinephrine, nicotine and related drugs (Fig. 8) .....                            | 358 |
| Tracings of respiration and blood pressure during three infusions of local anesthetic into a cat under "liquid dial" (Fig. 1) ..... | 364 |
| The effect of ergotamine on the intestine with observations on the influence of calcium on its action (Fig. 1) .....                | 372 |
| — effect of ergotamine on the intestine with observations on the influence of calcium on its action (Fig. 2) .....                  | 376 |
| — effect of ergotamine on the intestine with observations on the influence of calcium on its action (Fig. 3) .....                  | 380 |
| — influence of sodium phenobarbital (sodium luminal) on the cardiac action of pituitary extract (Fig. 1) .....                      | 389 |
| — toxic action of p-diazoiminobenzene hydrochloride and of its additive compound with cupric chloride (Fig. 1) .....                | 413 |
| — toxic action of p-diazoiminobenzene hydrochloride and of its additive compound with cupric chloride (Fig. 2) .....                | 414 |
| Effect of p-diazoiminobenzene hydrochloride on temperature in artificially induced fever in rabbits (Fig. 3) .....                  | 417 |
| Blood pressure kymograms showing the acriflavine "reversal" due to anesthetic (above) and ergotamine (below) (Fig. 1) .....         | 429 |
| Studies on the Pharmacology of Metaphen and Acriflavine (Fig. 2) .....  | 431 |
| The effect of phosphate and bicarbonate buffers on the ionization of calcium salts in physiologic salt solutions (Chart 1) .....    | 437 |
| — effect of phosphate and bicarbonate buffers on the ionization of calcium salts in physiologic salt solutions (Chart 2) .....      | 438 |
| — effect of phosphate and bicarbonate buffers on the ionization of calcium salts in physiologic salt solutions (Chart 3) .....      | 439 |
| — stimulant action of nicotine upon the spleen (Fig. 1) .....   | 459 |
| — stimulant action of nicotine upon the spleen (Fig. 2) .....   | 459 |
| — stimulant action of nicotine upon the spleen (Fig. 3) .....   | 461 |
| — stimulant action of nicotine upon the spleen (Fig. 4) .....   | 462 |
| On the pharmacologic action of some new choline derivatives in relation to their chemical constitution (Fig. 1) .....               | 473 |
| Ten-kilogram non-anesthetized dog (Fig. 1) .....  | 483 |
| Non-anesthetized dog, weight 10 kgm. (Fig. 2) .....   | 484 |
| — dog, weight 14 kgm. (Fig. 3) .....  | 484 |
| — dog, weight 10 kgm. (Fig. 4) .....  | 486 |
| — dog, weight 18 kgm. (Fig. 5) .....  | 487 |
