INDEX TO VOLUME XLV

Absorption, serum concentration and narcotic effects of magnesium, A note on the .......................................................... 109
Adams, Roger, Stanley, W. M., Coleman, G. H., Greer, C. M., and Sacks, J. Bacteriological action of certain synthetic organic acids toward Mycobacterium leprae and other acid-fast bacteria .................................................. 121
American Society for Pharmacology and Experimental Therapeutics, The Scientific Proceedings of the ........................................ 253
Anesthesia, Spinal, in summer frogs ............................................................... 291
Animal skin, unbroken, About the fate of free iodine upon application to the .......................................................... 85
Atropine, morphine and strychnine, The response of intact intestine in non-anesthetized dogs to cathartic agents as influenced by ......... 299

Bacteria, Mycobacterium leprae and other acid-fast, Bacteriological action of certain synthetic organic acids toward ........................................ 121
Bacteriological action of certain synthetic organic acids toward Mycobacterium leprae and other acid-fast bacteria .................................................. 121
Barbital, The influence of, upon cocaine poisoning in the rat .................................................. 383
Barium chloride, The effect of, on the salivary secretion .................................................. 53
Bates, Robert W., and Gerlough, Tillman D. The purification and some properties of insulin .......................................................... 19
Benzothiazoles, Contribution to the pharmacology of the ........................................ 189
Benzyl-vanillylethylamine, vanillyl-ethylamine and vanillyl-methylamine .......................................................... 163
Bieter, Raymond N., Harvey, A. McG., and Burgess, W. W. Spinal anesthesia in summer frogs .......................................................... 291
Bishop, Courtney C., Light, Richard U., and Kendall, Lee G. The production of gastric lesions in rabbits by injection of small amounts of pilocarpine into the cerebrospinal fluid .......................................................... 227
Bismuth compounds and neoaarphenamine, Activity of iodobismitol in experimental rabbit syphilis, compared with some other .................................................. 469
——, electronegative, A soluble compound of, for use in treatment of syphilis .................................................. 427
Bliss, A reply to .................................................. 487
Blood protein amide nitrogen, Is, a source of urinary ammonia .................................................. 487
Body weight, Relation of caffeine dosage to, in striated muscle response .................................................. 389
Bogert, Marston Taylor, and Husted, Helen G. Contribution to the pharmacology of the benzothiazoles .......................................................... 189
Bronchi, isolated, The effect of calcium on the response of, to histamine .................................................. 419
Bryan, William T. K., Gruber, Charles M., and Richardson, Lyman K. The response of intact intestine in non-anesthetized dogs to cathartic agents as influenced by morphine, atropine and strychnine .................................................. 299
——, Richardson, Lyman K., and Gruber, Charles M. The intact intestine in non-anesthetized dogs as influenced by colocynth and podophyllin .................................................. 77

—, codeine and their derivatives, Studies on ............................................................................................................................... 361
Muscle response, striated, Relation of caffeine dosage to body weight in .... 389
Mycobacterium leprae and other acid-fast bacteria, Bacteriological action of certain synthetic organic acids toward ................................. 121
Narcotic effects of magnesium, A note on the absorption, serum concentration and .......................................................... 109
Nash, Thomas P., Jr., and Williams, Edward F., Jr. Is blood protein amide nitrogen a source of urinary ammonia? II. A reply to Bliss. 487
Neoarphenamine and bismuth compounds, Activity of iodobismutol in experimental rabbit syphilis, compared with some other........ 469
Neuwirth, Isaac, and Wallace, George B. A note on the absorption, serum concentration and narcotic effects of magnesium........... 109
Non-anesthetized dogs, The response of intact intestine in, to cathartic agents as influenced by morphine, atropine and strychnine. 299
Nyiri, William, and Jannitti, Marie. About the fate of free iodine upon application to the unbroken animal skin. An experimental study ...... 85
Organic acids, certain synthetic, Bacteriological action of, toward Mycobacterium leprae and other acid-fast bacteria. .................. 121
Oviduct of the domestic fowl, The action of certain drugs on the..... 113
Ovulation in the rabbit, On the mechanism of ......................... 7
Parkins, William M., and Salant, William. Studies on the response of the isolated intestine to ergotamine with special reference to the influence of ions ............................................................. 315
Pilocarpine, The production of gastric lesions in rabbits by injection of small amounts of, into the cerebrospinal fluid .................... 227
Podophyllin and colocynth, The intact intestine in non-anesthetized dogs as influenced by ............................................................. 77
Potency, The relation of size of ergot to .................................... 183
Pregnancy, Quantitative observations on the action of extracts of urine of... 7
Proceedings of the American Society for Pharmacology and Experimental Therapeutics, The Scientific:
The relation of blood osmotic pressure to the production of fever. By H. G. Barbour and Alfred Gilman ...................................... 253
Further studies concerning the action of diuretics upon the glomerular kidney. By Raymond N. Bister .................................. 233
Studies on ether dosage after pre-anesthetic medication with narcotics. By Frank A. Calderone ............................................. 254
The fate of glyceryl trinitrate in tolerant and non-tolerant dogs. By Nathan A. Crandall, Jr. .................................................. 255
The action of the codeine isomers and some of their derivatives. By Nathan B. Eddy .......................................................... 256
A comparison of phenanthrene and some 2-, 3-, and 9-mono-substitution products. By Nathan B. Eddy .................................. 257
The measurement of the depressant action of the codeine isomers and related substances by the use of maze-trained rats. By Nathan B. Eddy and A. Kenneth Simon ........................................... 257
Some laboratory experiments with liver extract. By C. W. Edmunds and Harold H. Brueckner ................................................................. 238
The effect of drugs upon the longitudinal and circular muscle of the rabbit's intestine. By Harold N. Ets and H. V. Valentine ........... 239
The estimation of the pH of normal and malignant tissues in living animals by means of the capillary glass electrode. By R. H. Fitch, Herbert Kahler and Carl Voegtlin ...................................................... 259
The stability of tinctures of digitalis determined by different methods of standardization. By R. H. K. Foster and H. B. van Dyke .... 260
The correlation of the pharmacodynamic actions with the metabolic changes induced by posterior pituitary extracts in normal dogs. By E. M. K. Geiling and A. M. DeLawder .................. 261
The inverse relation of blood osmotic pressure to insensible weight loss. By Alfred Gilman and H. G. Barbour .......................... 262
The effects of therapeutic doses of pituitrin, pitocin and pitressin on the cardiac output, oxygen consumption and related functions in normal man. By A. Grollman, E. M. K. Geiling and A. M. DeLawder .... 262
Cardiac changes in rabbits induced by drugs. By Charles M. Gruber, Isaac Y. Olch and Brian Blades ........................................ 263
The mechanism of chorda stimulation of the salivary glands. By V. E. Henderson and M. H. Roepke ........................................ 264
A rapid method for determining magnesium in blood and urine. By Arthur D. Hirschfelder and Earl R. Series ............................. 264
The pharmacology of certain respiratory phenomena. By D. E. Jackson. 264
The capillary glass electrode for the estimation of pH in biological sys-
tems. By Herbert Kahler, R. H. Fitch and Carl Voegtlin ............ 265
A study of the effects of codeine and its isomers on the movements of the small intestine. By Hugo M. Krueger and Nathan B. Eddy .... 266
The refractory period of smooth muscle. By T. K. Kruse ................ 267
Some experiments with an insulin-free pancreatic extract. By A. E. Livingston ................................................................. 267
Comparative studies in barbiturate antagonism with strychnine and picrotoxin. By A. H. Maloney ................................................ 267
Some uses of the thoracic window. By Walter L. Mendenhall .......... 268
Some observations on the pharmacology of the respiratory mechanism. By Michael G. Mulinos and John Atheneos ...................... 269
Electrocardiographic studies of the so-called "heart depressants;" aconite and veratrum. By James C. Munch and Joseph B. Wolfe ... 269
Chemotherapy of new derivatives of 3-amino-4-hydroxyphenylarsionic acid. By George W. Raizis, M. Severac and Leroy W. Clemence ... 270
The action of ether and chloroform on fibroblasts in tissue cultures. By Morris Rosenfeld and Tobias Weinberg .................................. 271
The formation of arsenoxide from the arsphenamines in the living animal and in test-tube oxidations. By Sanford M. Rosenthal ......... 272
The effect of ions on the action of drugs. By William Salant and William M. Parkins ................................................................. 273
On the action of various uric acid eliminants upon (a) experimental uric acid storage in the kidney, (b) upon the endogenous uric acid, allan-
toin and total nitrogen excretion. By Hermann O. Schroeder ....... 273
Studies on the pharmacological action of chiniofon other than its amoebicidal properties. By E. W. Schwartz and G. A. Billingham .......... 273
The question of synergism between magnesium sulphate and ether. By L. F. Shackell and R. Blumenthal .................................. 274
The organ distribution of bismuth in a patient with chronic bismuth poisoning. By Torald Sollmann and Katharine I. Henderson ........... 275
A photographic method for observing coronary inflow and some results (preliminary) obtained therewith. By R. L. Stehle and K. I. Melville. 277
Further observations on the gonad-stimulating principle of the pituitary body. By H. B. van Dyke and Zonja Wallen-Lawrence ............ 277
Notes on the toxicity and pharmacology of indium. By W. F. von Oettingen ................................................................................ 278
A comparative study of the cumulation of certain digitalis bodies. By E. W. Wallace and H. B. van Dyke .................................. 278
A digitalis-like action of extracts made from holly. By Russell A. Waud. 279
Factors modifying the response of blood pressure and cerebrospinal fluid pressure of unanesthetized animals to fixed pharmacological stimuli. By S. J. Weinberg .................................................................. 280
Further studies in the assay of pituitary extracts for their anti-diuretic activity. By G. G. Woods and Erwin E. Nelson .................. 281
The action of ergotamine tartrate on the ileum and colon of unanesthetized, trained dogs. By Frederick F. Yonkman ............ 281
Histamine miosis. By Frederick F. Yonkman .................................. 282
The action of quinine bisulphate on the ileum and colon of unanesthetized, trained dogs. By Frederick F. Yonkman .................. 282
Colon activation by intravenous, hypertonic sodium chloride injection in unanesthetized, trained dogs. By Frederick F. Yonkman .......... 282

Rabbit, On the mechanism of ovulation in the ....................................... 7
Rabbits, The production of gastric lesions in, by injection of small amounts of pilocarpine into the cerebrospinal fluid .................. 227
Rat, The influence of barbital upon cocaine poisoning in the .......... 383
Richardson, Lyman K., Gruber, Charles M., and Bryan, William T. K. The intact intestine in non-anesthetized dogs as influenced by colocynth and podophyllin ................................................................. 77
— Gruber, Charles M., and Bryan, William T. K. The response of intact intestine in non-anesthetized dogs to cathartic agents as influenced by morphine, atropine and strychnine ...................................... 299

Sacks, J., Stanley, W. M., Coleman, G. H., Greer, C. M., and Adams, Roger. Bacteriological action of certain synthetic organic acids toward Mycobacterium leprae and other acid-fast bacteria ......................................................................................... 121
Salant, William, and Parkins, William M. Studies on the response of the isolated intestine to ergotamine with special reference to the influence of ions ............................................................................................................. 315
Salivary secretion, The effect of barium chloride on the. ........................... 53
Serum concentration, absorption and narcotic effects of magnesium, A note on the................................................................. 109
Sodium iodobismuthite, Physical and chemical properties of .................. 427
Spaulding, Jean, Gurchot, Chas., and Hanslik, P. J. Physical and chemical properties of sodium iodobismuthite, a soluble compound of electronegative bismuth for use in the treatment of syphilis. .................. 427
