INDEX TO VOLUME 53

Absorption, Intrapulmonic, of iodine ........................................ 327
Abstinence, addiction, and tolerance in the rat, A method for testing .... 179
Acetals, cyclic, some, Narcotic potency of .................................... 440
Acetanilid poisoning .................................................................... 401
Acetylcholine and histamine, The quantitative action of, on the guinea pig uterus ......................................................... 340
Addiction, tolerance and abstinence in the rat, A method for testing .... 179
Adults, normal young, Comparative effect of caffeine per se and a caffeine beverage (coffee) upon the reaction time in ....................... 304
A glomerular toadfish, The action of diuretics injected into one kidney of the ................................................................. 347
Air, inspired, Concentrations of ether vapor in the, and in the blood required for anesthesia, loss of reflexes and death ..................... 251
Alkyl side chains, normal, Phenols with other than ....................... 239
Alkylhydroxybenzenes, Anthelmintic studies on .............................. 198
— hydroxybenzenes, Anthelmintic studies on ................................. 218
— hydroxybenzenes, Anthelmintic studies on ................................. 227
— hydroxybenzenes, Anthelmintic studies on ................................. 234
— hydroxybenzenes, Anthelmintic studies on ................................. 239
6-n-Alkyl-meta-cresols .................................................................. 227
—, The oral toxicity of ................................................................ 264
Alkylpolyhydroxybenzenes ............................................................ 198
Amberson, William R., and McClanahan, Jr., H. H. Bicarbonate elimination through the salivary glands under nervous and chemical stimulation 189
Amidopyrine antipyresis, The reversal of febrile liver hydration with .... 350
Anaesthetics, local, The action of, on the respiratory apparatus ......... 454
Anesthesia, Concentrations of ether vapor in the inspired air and in the blood required for, loss of reflexes and death ..................... 251
—, Ether: concentrations in the inspired air and in the blood required for anesthesia, loss of reflexes and death ......................... 251
Anthelmintic studies on alkylhydroxybenzenes .................................. 198
— studies on alkylhydroxybenzenes ............................................. 218
— studies on alkylhydroxybenzenes ............................................. 227
— studies on alkylhydroxybenzenes ............................................. 234
— studies on alkylhydroxybenzenes ............................................. 239
Antipyresis, amidopyrine, The reversal of febrile liver hydration with .... 350
Avertin (tribrom-ethanol), The effect of, on the electrical changes in the human heart ................................................................. 139

INDEX

—, Lamson, P. D., Brown, H. W., Stoughton, R. W., Harwood, P. D., and Bass, A. Anthelmintic studies on alkylhydroxybenzenes. V. Phenols with other than normal alkyl side chains ............................................... 239
Barbiturates in the brain, Distribution of .............................................. 137
—, Studies on .......................................................................................... 137
Barbour, Fleming A., and Wright, Charles I. The respiratory effects of
morphine, codeine and related substances. III. The effect of morphine,
dihydromorphine, dihydromorphinone (dilaudid) and dihydrocodeinone
(dicodid) on the respiratory activity of the rabbit .................................. 34
exchange. XIX. The reversal of febrile liver hydration with amidopyrine
antipyresis ............................................................................................ 350
Basal metabolism, Comparison of the effects of potassium iodide and of diodo-
tyrosin upon .................................................................................... 418
