— strip response, Caffeine-nicotine antagonism in........................... 230
— strip, Nicotine influence upon the response of the........................ 222
Skeletal muscle, A veratrine-like action on, of certain 9-substitution products of phenanthrene.................................................. 87
Smith, Paul K., and Hambourger, W. E. The ratio of the toxicity of acetanilid to its antipyretic activity in rats............................. 346
Smith, Ralph G. Studies of phenanthrene derivatives. IV. A veratrine-like action on skeletal muscle of certain 9-substitution products of phenanthrene................................................................. 87
Sodium formaldehyde sulphoxylate, The use of, in acute mercury poisoning. 34
Sodium N-methyl-cyclohexenyl-methyl-barbituric acid (evipal): hypnosis, anesthesia and toxicity.................................................. 77
Styryl selenazole compounds, certain, The trypanocidal action of......... 307
INDEX

Surface tension and pH, The relation of, to the activity of local anesthetics. 309
Swanson, Edward E., Davis, M. Edward, Adair, Fred L., and Chen, K. K.
The pharmacologic action of ergotocin, a new ergot principle. 398

Tainter, M. L., and Terada, B. Metabolic response of white rats to continued administration of dinitrophenol. 454
Teather, A. R., and Ogden, Eric. Observations on dogs under the continued influence of ephedrine. 320
Terada, B., and Tainter, M. L. Metabolic response of white rats to continued administration of dinitrophenol. 454
Thierry fistulae, A comparison of the motor effects of morphine, codeine and dihydromorphinone hydrochloride (dilaudid) on. 53
Thyroid acini in guinea pigs, The relation between the quantity of thyroid-stimulating hormone of the anterior pituitary gland administered and the proliferative activity and hypertrophy of the. 246
Thyroid-stimulating hormone of the anterior pituitary gland administered, The relation between the quantity of, and the proliferative activity and hypertrophy of the thyroid acini in guinea pigs. 246
Toxicity and hypoglycemic effect of several guanidine compounds, An investigation of the. 17
— hypnosis and anesthesia: Sodium N-methyl-cyclohexenyl-methylbarbituric acid (evipal). 77
— of acetanilid, The ratio of the, to its antipyretic activity in rats. 346
— of methyl mercaptan for fresh water fish, The. 448
— of retorsine, The action and. 299
Trichlorethylene, A contribution to the pharmacology of. 327
Trypanocidal action of certain styryl selenazole compounds, The. 367
Tucker, S. Horwood, Browning, H., and Gulbransen, R. The antiseptic action of carbazole-3-diazonium chloride and certain other diazonium compounds. With a note on the preparation of carbazole-3-diazonium chloride. 353

Urinary bladder mechanisms, The. 408
Urine, A simple method for the administration of the estrogenic substances of. 393
— of normal persons, The identity of the reducing substance in the, following the ingestion of amidopyrine. 100
Ureas, Various, The relative anesthetic effects of. 188

van Dyke, H. B., and Li, R. C. Cumulative poisoning by lanadigin, ouabain, and digitoxin in dogs. 415
Vartiainen, A. The action of certain new histamine derivatives. 265
—, The action of ergoclavine and sensibamine. 259
Ventricular response in caffeine-nicotine antagonism. 42
Veratrine-like action on skeletal muscle of certain 9-substitution products of phenanthrene, A. 87

Walton, Robert P., and Lacey, C. Frank. A comparison of the motor effects of morphine, codeine and dihydromorphinone hydrochloride (dilaudid) on Thierry fistulae. 53
