CONTENTS

NUMBER 1, MAY, 1936

I. A Method for Obtaining a Preparation of the Melanophore Hormone of the Pituitary Gland. R. L. Stehle..... 1

II. A New Bloodless Method for Continuous Recording of Peripheral Circulatory Changes. Hans Molitor and Michael Kniazuk... 6

III. The Relative Hypnotic Effects of Some Aryl and Unsymmetrical Alkylaryl Thioureas. Edwin J. deBeer, Johannes S. Buck, Walter S. Ide and Axel M. Hjort..... 19

IV. Effects of Acetanilid on the Growth and Blood Morphology of Rats. Paul K. Smith and W. E. Hambourger..... 34

V. The Growth and Blood Morphology of Rats Receiving Sodium Bromide, Caffeine and Combinations with Acetanilid. Paul K. Smith and W. E. Hambourger..... 43

VI. The Thyrotropic Hormone of the Pituitary Gland and Iodine Metabolism. Benjamin F. Stimmel, D. Roy McCullagh and Valerian Picha..... 49

VII. Chemotherapeutic Action on *Sp. minus* in Mice by Certain Anil and Styryl Quinoline Compounds Free from Metals or Metalloids. C. H. Browning and R. Gulbransen..... 56

VIII. Effect of Dinitrophenol on Rate of Alcohol Metabolism. H. W. Newman and M. L. Tainter..... 67

IX. Ergotocin, Ergometrine, Ergostetrine and Ergobasine. K. K. Chen, Edward E. Swanson, E. C. Kleiderer and G. H. A. Clowes. 74

X. The Toxicity and Glycaemic Properties of a Number of Amidine and Guanidine Derivatives. W. A. Broom..... 81

XI. Dilation of the Coronary Vessels by Certain Organic Extracts and Drugs. Charles W. Greene..... 98

NUMBER 2, JUNE, 1936

XII. The Scientific Proceedings of the American Society for Pharmacology and Experimental Therapeutics, Incorporated. Twenty-Seventh Annual Meeting, Held at Washington, D. C., March 25, 26, 27, 28, 1936. Edited by the Secretary, E. M. K. Geiling.... 113

XIII. Comparative Actions of Sympathomimetic Compounds: Bronchodilator Actions in Bronchial Spasm Induced by Histamine. W. M. Cameron and M. L. Tainter..... 152

XIV. The Effect of Morphine Sulphate and of Dihydromorphinone Hydrochloride upon the Antrum, Pyloric Sphincter and Duodenum in Non-Anesthetized Dogs. Charles M. Gruber, J. Earl Thomas, Joseph O. Crider and John T. Brundage..... 170

- XV. The Action of Certain Choline Derivatives on the Coronary Flow. Alfred M. Wedd 179
- XVI. The Effect of Certain Salicyl Derivatives on the Isolated Hearts of Frogs and Turtles. Robert L. Johnston 193

NUMBER 3, JULY, 1936

- XVII. The Local Anaesthetic Actions of Certain Pyrazoline and Quinoline Compounds. H. K. Sinha 199
- XVIII. Threshold Anesthetic and Lethal Concentrations of Certain Spinal Anesthetics in the Rabbit. Raymond N. Bieter, Raymond W. Cunningham, Oa Lenz and J. J. McNearney 221
- XIX. Addiction and Tolerance to Barbiturates? The Effects of Daily Administration and Abrupt Withdrawal of Phenobarbital-Sodium and Pentobarbital-Sodium in the Albino Rat. Eugene J. Stanton 245
- XX. The Effect of Acid on the Guinea Pig Ileum Contracted by Acetylcholine and Histamine. James W. Sachs and Joseph McK. Ivie 253
- XXI. Studies on Barbiturates. XV. The Excretion of Barbitol in Normal and Nephropathic Subjects. William P. Argy, Charles R. Linegar and James M. Dille 258
- XXII. On the Duration of Spinal Anesthesia in the Rabbit. Raymond N. Bieter, J. J. McNearney, Raymond W. Cunningham and Oa Lenz 264
- XXIII. Some Pharmacological and Toxicological Properties of Vinyl Ether. Hans Molitor 274
- XXIV. On the Cause of the Delayed Death in the Rat by Isopropyl Betabromallyl Barbituric Acid (Nostal) and Some Related Barbiturates. Harald G. O. Holck and Paul R. Cannon 289
- XXV. Studies on the Respiratory Actions of Drugs by Means of Phrenic Potentials. I. Nicotine. Harry Gold and Walter Modell 310
- XXVI. The Reactions of the Human Foetal Gastrointestinal Tract in vitro. A. D. McLachlin 324

NUMBER 4, AUGUST, 1936

- XXVII. Comparative Effects of Barbituric Acid Derivatives on the Isolated Heart. Robert L. Johnston 333
- XXVIII. Comparative Assay of Oestrone in Rat and Mouse. A. M. Hain and J. M. Robson 337
- XXIX. Action of Epinephrine, Tyramine and Ephedrine on Small Intestine of Unanesthetized Dog, Before and Following the Administration of Cocaine. Charles M. Gruber 347
- XXX. Studies on the Pharmacological Action of Coriamyrtin. A. H. Maloney 361
- XXXI. Rôle of Potassium in Epinephrine Action. W. J. R. Camp and J. A. Higgins 376

XXXII. Alcohol Injected Intravenously: Further Observations on the Effect of Habituation on Rate of Metabolism. Henry W. Newman and Windsor C. Cutting.....	388
XXXIII. Anaesthetic Effects of Some Furan Derivatives. V. E. Henderson and A. H. R. Smith.....	394
XXXIV. Rate of Bismuth Absorption in Experimental Animals Following Peroral Administration. Geo. E. Clarke and Homer F. Marsh.....	399
XXXV. Pharmacological Action of Coriamyrtin. Edward E. Swanson and K. K. Chen.....	410
XXXVI. Rôle of Histamine in Canine Anaphylactic Shock. Carl A. Dragstedt and Franklin B. Mead.....	419
XXXVII. Action of Drugs on the Choline Esterase of the Brain. Frederick Bernheim and Mary L. C. Bernheim.....	427
XXXVIII. Depression of Respiration by Oxygen. E. K. Marshall, Jr., and Morris Rosenfeld.....	437
XXXIX. Site of Action of Caffeine as a Respiratory Stimulant. D. H. Le Messurier.....	458
XL. Antagonism between Ephedrine Sulphate and Sodium Isoamylethylbarbiturate (Sodium Amytal) after Intracisternal Injection during Morphine-sodium Isoamylethylbarbiturate (Sodium Amytal) Anesthesia and Ether Anesthesia. James C. Rice and Robert M. Isenberger.....	464
XLI. Biologic Assay of "International Standard" Estrin and of Certain Commercial Preparations. Fred E. D'Amour and R. G. Gustavson.....	472

ILLUSTRATIONS

Wiring diagram of apparatus for recording peripheral circulatory changes (fig. 1)	8
Photo-electric cell (fig. 2)	9
— cell in position (fig. 3)	9
Effect of active hyperemia; peripheral vasodilatation after intravenous injection of bulbocapnine (fig. 4)	11
— of congestion on peripheral circulation (fig. 5)	12
Difference between regular Traube-Hering waves and response to a sensory stimulus (fig. 6)	13
Effect of intravenous injection of papaverine on peripheral circulation (fig. 7)	14
— of two equal doses of adrenalin on peripheral circulation (fig. 8)	15
Influence of small and large doses of morphine on vascular response to sensory stimuli (fig. 9)	16, 17
Relative hypnotic values of thioureas, graphically expressed (fig. 1)	26
Duration of various phases of intoxications induced by thioureas, graphically expressed (fig. 2)	27
Growth of rats receiving daily doses of acetanilid (fig. 1)	36
— of rats receiving daily doses of acetanilid (fig. 2)	38
— of rats receiving daily doses of acetanilid (fig. 3)	40
— of rats receiving daily doses of caffeine and of acetanilid-caffeine (fig. 1)	46
Influence of respiratory volume and rebreathing on rate of fall of blood alcohol (fig. 1)	69
Comparison of ergotocin, ergometrine, ergostetrine and ergobasine on isolated rabbit's uterus (fig. 1)	77
Effects on coronary flow and blood pressure of 1 cc. padutin in jugular vein (fig. 1)	102
— on rate of coronary flow of 1 cc. padutin in jugular vein (fig. 2)	104
— on rate of coronary flow of 1 cc. pancreatic extract into jugular vein (fig. 3)	106
Effect of injection of 3 cc. of pancreatic extract into jugular vein to demonstrate active dilation of coronaries (fig. 4)	107
— on coronaries and blood pressure of intravenous injection of muscle extract, lacarnol (fig. 5)	108
— on coronaries and blood pressure of intravenous injection of muscle extract, lacarnol (fig. 6)	109
— on coronaries and blood pressure of injection of 2.5 cc. of 25 per cent aqueous solution of coramine into jugular vein (fig. 7)	110
Bronchodilator and pressure actions of sympathomimetic amines in pithed dogs treated with histamine: epinephrine, epinine, 3-4 dioxyphehrine, ethyl-norsuprarenin, arterenol and neosynephrine (fig. 1)	154
— and pressor actions of sympathomimetic amines in pithed dogs treated with histamine: cobefrin, ephedrine, phenylisopropylamine, octin and atropine (fig. 2)	157

Effect on gastric, pyloric and duodenal tonus and activity of injection of dihydromorphinone hydrochloride on unanesthetized male dog with gastric and duodenal fistulae (fig. 1).....	173
— on gastric, pyloric and duodenal tonus and activity of injection of dihydromorphinone hydrochloride on unanesthetized female dog with gastric and duodenal fistulae (fig. 2).....	175
Record of pyloric sphincter of cat under ether anesthesia (fig. 3).....	176
— of pyloric sphincter of dog under ether anesthesia (fig. 4).....	176
Reaction of coronary vessels of cat to injection of acetylcholine (figs. 1 and 2).....	183
Response of cat heart to successive injections of acetylcholine (fig. 3).....	184
Reaction of coronary vessels of cat to injection of carbaminoyl choline (fig. 4).....	185
Method of mounting sciatic-gastrocnemius of <i>Rana esculenta</i> Hung (fig. 1).....	201
Individual variations in paralysis of frog's sciatic (fig. 2).....	203
Anaesthesia of rabbit's cornea (fig. 3).....	206
— of rabbit's cornea (fig. 4).....	208
— of human wheal (fig. 5).....	209
— of rabbit's cornea (fig. 6).....	210
— of human wheal (fig. 7).....	211
Percentage mortality produced by intravenous injection of drugs in mice (fig. 8).....	213
Diagram showing site of injection in human fingers (fig. 9).....	215
Group median responses (struggles per minute) of rats during daily administration of phenobarbital-sodium and pentobarbital-sodium and after permanent withdrawal (fig. 1).....	248
Amount of acid necessary to relax and isolated strip of guinea pig ileum contracted with histamine and acetylcholine (fig. 1).....	255
Spinal anaesthesia in rabbit with procaine HCl (fig. 1).....	268
— anaesthesia in rabbit with procaine HCl, tutocaine, panthesine, metycaïne, pantocaine and nupercaine (fig. 2).....	270
Toxicity curves of chloroform, ethyl ether and vinyl ether during a 3-hour anaesthesia (fig. 1).....	276
Arrangement used for determination of chemical changes of vinyl ether during rebreathing (fig. 2).....	280
Toxicity curves of decomposed vinyl ether during a 3-hour anaesthesia (fig. 3).....	281
Relation between anaesthetic concentration and time of induction (fig. 4).....	284
Influence of temperature on time of induction in mice (fig. 5).....	285
— of temperature on time of recovery in mice (fig. 6).....	286
Amplifier used in study of phrenic potentials (fig. 1).....	311
Types of records of inspiratory impulses (fig. 2).....	316
Data from typical record of phrenic potentials before, during and after injection of nicotine (fig. 3).....	319
Tracings of respiratory cycles at different times before and after injection of nicotine in typical experiment (fig. 4).....	320
— of inspirations following injection of nicotine (fig. 5).....	321
Circular ring from stomach of human foetus (fig. 1).....	325
— ring from stomach of human foetus (fig. 2).....	326
Longitudinal section from jejunum of human foetus (fig. 3).....	327
— section from ileum of human foetus (fig. 4).....	327

Decrease in amplitude of cardiac contractions in succeeding minutes (fig. 1)	334
Average decrease in heart tracings in millimeters per minute (fig. 2)	335
Reactions of groups of 20 or 40 rats to oestrone and its benzoate (fig. 1)	339
— of groups of 20 or 40 mice to oestrone and its benzoate (fig. 2)	340
Thiry-Vella loop of jejunum from stomach of dog (fig. 1)	352
Record taken on dog with Thiry-Vella fistula of ileum (fig. 2)	353
Thiry-Vella loop of ileum of dog (fig. 3)	355
— loop of jejunum of animal (fig. 4)	356
Tracings showing carotid pressure and respiration following nembutal anesthesia in rabbit (fig. 1)	367
— showing carotid pressure and respiration following nembutal anesthesia (fig. 2)	367
Slowing of heart followed by acceleration following administration of potassium (fig. 1)	378
Changes in urinary bladder induced by potassium chloride and stimulation of cut cervical vagus (fig. 2)	380
Rise in blood pressure subsequent to vagus stimulation (fig. 3)	381
Changes induced in auricle and ventricle by epinephrine and potassium chloride (fig. 4)	382
Rise in blood pressure effected by potassium chloride after removal of adrenal glands (fig. 5)	382
Relaxation of duodenum and rise in blood pressure induced by epinephrine and potassium chloride (fig. 6)	383
Constriction of bronchial muscles effected by histamine and relieved by potassium chloride (fig. 7)	384
Contraction of kidney produced by potassium chloride (fig. 8)	386
Average blood alcohol values after administration of alcohol (fig. 1)	390
— blood alcohol values after administration of alcohol (fig. 2)	390
— blood alcohol values after administration of alcohol (fig. 3)	391
Detoxification of "sodium amytal" by coriamyrtin (fig. 1)	416
Estimation of activity of brain choline esterase by guinea pig ileum (fig. 1a)	428
Effect of addition of brain esterase on intestine contracted by acetylcholine (fig. 1b)	429
— of hydrogen ion concentration on activity of brain choline esterase (fig. 2)	430
— of different concentrations of morphine and apomorphine on hydrolysis of acetylcholine by brain esterase (fig. 3)	433
Respiratory depression following administration of oxygen after anesthetization with phenobarbital sodium and injection of morphine (fig. 1)	439
— depression following administration of oxygen after anesthetization with phenobarbital sodium and injection of morphine (fig. 2)	440
Oxygen depression in cats under different anesthetics (fig. 3)	441
Respiratory depression following administration of oxygen preceded by injection of morphine sulfate (fig. 4)	442
Respiration following administration of carbon dioxide in oxygen and in air preceded by anesthetization with phenobarbital sodium (fig. 5)	443
— and blood pressure following administration of oxygen preceded by anesthetization with phenobarbital sodium and injection of morphine sulfate (fig. 6)	445

Respiration following administration of oxygen preceded by anesthetization with phenobarbital sodium (fig. 7)	446
— following administration of oxygen preceded by anesthetization with phenobarbital sodium (fig. 8)	447
Percentage saturation of hemoglobin of arterial blood plotted against percentage reduction of respiratory minute volume by oxygen (fig. 9)	448
Respiration and blood pressure following administration of oxygen preceded by anesthetization with phenobarbital sodium and injection of morphine sulfate (fig. 10)	451
Effect of intravenous injection of caffeine sodium benzoate on respiration and blood pressure (fig. 1)	460
— of intravenous injection of caffeine sodium benzoate and of epinephrine on respiration and blood pressure (fig. 2)	461
— of intravenous ephedrine and of cisternal ephedrine on duration of cisternal sodium amylal respiratory paralysis (fig. 1)	466
Effects of cisternal ephedrine on duration of cisternal sodium amylal respiratory paralysis (fig. 2)	467
Respiration following administration of sodium amylal and ephedrine sulfate (fig. 3)	469
— following administration of sodium amylal and ephedrine sulphate (fig. 4)	469
Biologic assay of "International Standard" estrin and of certain commercial preparations (fig. 1)	476
— assay of "International Standard" estrin and of certain commercial preparations (fig. 2)	476
— assay of "International Standard" estrin and of certain commercial preparations (fig. 3)	477
— assay of "International Standard" estrin and of certain commercial preparations (fig. 4)	479
— assay of "International Standard" estrin and of certain commercial preparations (fig. 5)	479
— assay of "International Standard" estrin and of certain commercial preparations (fig. 6)	480
