INDEX TO VOLUME VII

Action of cocaine .................................................. 423
— of caffein and of epinephrin upon the vagus nerve ........ 541
— of drugs on the isolated gall-bladder .......................... 83
— of phenylethylamin on the heart ................................ 511
— of the opium alkaloids, individually and in combination with each other on the respiration ........................................ 339
— of veratrum viride .................................................. 63
Antitoxic action of rattlesnake serum on rattlesnake venom with a note on the percentage of total solids of the serum and bile ........................................ 125
Apparatus for the perfusion of isolated organs ................... 467
Arrest of the heart, Intrapericardial medication and massage in the treatment of ...................................................... 31
Arthritis, The influence of some drugs used in the treatment of gout and ............................................................. 601
Auricular fibrillation, The change produced in the bloodflow (in the hands) under the influence of digitalis in cases of .................................... 263
Barbour, Henry G. Morphin and scopolamin action upon the intact uterus. 547
— and Copenhaver, Nat H. The response of the surviving uterus to morphin and scopolamin ........................................ 529
— and Frankel, Edward M. The action of phenylethylamin on the heart. 511
— and Kleiner, Simon B. The action of caffein and of epinephrin upon the vagus nerve ............................................. 541
Bitter tonics, Further studies on the action of, on the secretion of gastric juice .............................................................. 577
Bloodflow (in the hands), The change produced in the, under the influence of digitalis in cases of auricular fibrillation ........................................ 263
— (in the hands or feet) due to mechanical causes, Criteria by which deficiencies in the, may be discriminated from changes due to functional (vasomotor) causes .............................................. 281
— in normal human subjects, Effect of caffein upon the ........ 449
— in a patient with double aortic and double mitral disease .... 441
Caffeine, Action of, upon the vagus nerve ................................ 541
— Effect of, upon the bloodflow in normal human subjects .... 449
— Preliminary experiments on the action of .......................... 485
Cardio-inhibitory center, The central action of digitalis as tested by the ......................................................... 591
Central action of digitalis as tested by the cardio-inhibitory center .............................................................. 591
Cevadin (veratrin), The effects of veratrum viride and .......... 295
Chelidonin, Effects of, on smooth muscle .......................... 99
Cholin, A physiological test for, and some of its applications .... 301
Circulation in man, Studies on the .................................... 263, 281
Cocaine, On the action of ............................................ 423
Comparative action of the stereo-isomers of hydroxyhydrindamine ..... 121

613
Contributions to the physiology of the stomach.......................... 577
Copenhaver, Nat H., and Barbour, Henry G. The response of the surviving
uterus to morphin and scopolamin........................................ 529
Cramer, William. On the action of veratrum viride ...................... 63
Criteria by which deficiencies in the bloodflow (in the hands or feet) due to
mechanical causes may be discriminated from changes due to functional
(vasomotor) causes.......................................................... 281
Denis, W. Influence of salicylates on the elimination of uric acid and other
waste products from the blood............................................ 255
— Influence of some drugs used in the treatment of gout (and arthritis)
on the elimination of uric acid and other waste products from the blood. 601
Digitalis, The central action of, as tested by the cardio-inhibitory center... 591
— The change produced in the bloodflow (in the hands) under the influence
of, in cases of auricular fibrillation...................................... 263
Double aortic and double mitral disease, The blood flow in a patient with. 441
Drinker, Cecil K., and Richards, A. N. An apparatus for the perfusion of
isolated organs.............................................................. 467
Drugs, Seat of the emetic action of various ............................. 225
— used in the treatment of gout (and arthritis), Influence of some..... 601
Effect of caffeine upon the bloodflow in normal human subjects........ 449
— of certain drugs on the respiration and gaseous metabolism in normal
human subjects............................................................. 1
Effects of chelidonin on smooth muscle .................................. 99
— of veratrum viride and cevadin (veratrin).............................. 295
Eggleston, Cary, and Hatcher, Robert A. The seat of the emetic action of
various drugs .............................................................. 225
Emetic action of various drugs, Seat of the ............................. 225
Epinephrin, The action of, upon the vagus nerve ....................... 541
Feiss, H. O., and Marine, David. The absorption of potassium iodid by
perfused thyroid glands and some of the factors modifying it ......... 557
Frankel, Edward M., and Barbour, Henry G. The action of phenylethyl-
amin on the heart......................................................... 511
Gall-bladder, Action of drugs on the isolated ........................... 83
Gaseous metabolism in normal human subjects.......................... 1
Gastric juice, Further studies on the action of bitter tonics on the secretion
of.......................................................... 577
Gout (and arthritis), Influence of some drugs in the treatment of..... 601
Green, C. W., and Peeler, J. O. The central action of digitalis as tested by
the cardio-inhibitory center................................................. 591
Greenwald, Isidor. Observations on the effect of intravenous injections of
sodium phosphate......................................................... 57
Gunn James A., and Martin, Philip A. Intrapericardial medication and
massage in the treatment of arrest of the heart ......................... 31
Hanzlik, Paul J. The effects of chelidonin on smooth muscle .......... 99
Hatcher, Robert A., and Eggleston, Cary. The seat of the emetic action of
various drugs ............................................................. 225
Heart, Action of phenylethylamin on the.................................. 511
Heart, Intrapericardial medication and massage in the treatment of arrest of the ........................................... 31
Higgins, Harold L., and Means, James H. The effect of certain drugs on the respiration and gaseous metabolism in normal human subjects .... 1
Hirudin preparations, The toxicity of certain ........................................... 157
Hoekins, R. G., and Ranson, S. Walter. The vasomotor reaction to nicotine locus of stimulation ............................ 375
Hunt, Reid. A physiological test for cholin and some of its applications .... 301
Hydroxyhydrindamine, Comparative action of the stereo-isomers of .... 121
Ikeda, Yasuo. Comparative action of the stereo-isomers of hydroxyhydrindamine ........................................... 121
Influence of salicylates on the elimination of uric acid and other waste products from the blood ........................................... 255
— of some drugs used in the treatment of gout (and arthritis), on the elimination of uric acid and other waste products from the blood ... 601
Intact uterus, Morphin and scopolamir action upon the ....................... 547
Intrapericardial medication and massage in the treatment of arrest of the heart ........................................... 31
Intravenous injections of sodium phosphate, Observations on the effect of ........................................... 57
Isolated organs, An apparatus for the perfusion of ........................................... 467
Kidney, Urine formation by the perfused ........................................... 485
Kleiner, Simon B., and Barbour, Henry G. The action of caffein and of epinephrin upon the vagus nerve ........................................... 541
Kuroda, M. On the action of cocaine ........................................... 423
Lamson, Paul D. Rôle of the liver in acute polycythaemia: a mechanism for the regulation of the red corpuscle content of the blood .......... 169
Lieb, Charles C., and McWhorter, John E. Action of drugs on the isolated gall-bladder ........................................... 83
Liver in acute polycythaemia, The rôle of ........................................... 169
McGuigan, Hugh, and Ross, E. L. The similarity and synergy of morphine and strychnine action ........................................... 385
Macht, D. I. Action of the opium alkaloids, individually and in combination with each other, on the respiration ........................................... 339
McWhorter, John E., and Lieb, Charles C. Action of drugs on the isolated gall-bladder ........................................... 83
Marine, David, and Feiss, H. O. The absorption of potassium iodid by perfused thyroid glands and some of the factors modifying it ....... 557
Marshall, E. K. The toxicity of certain hirudin preparations .................... 157
—, Lamson, Paul D., and Turner, B. B. Observations on plasmaphaeresis 129
Marshall, John, and Welker, William H. The antitoxic action of rattlesnake serum on rattlesnake venom with a note on the percentage of total solids of the serum and bile ........................................... 125
Martin, Philip A., and Gunn, James A. Intrapericardial medication and massage in the treatment of arrest of the heart ........................................... 31
Massage in the treatment of arrest of the heart ........................................... 31
Means, J. H., and Higgins, Harold L. The effect of certain drugs on the respiration and gaseous metabolism in normal human subjects .... 1
Means, J. H., and Newburgh, L. H. The bloodflow in a patient with double aortic and double mitral disease. 441
---, and Newburgh, L. H. The effect of caffeine upon the bloodflow in normal human subjects. 449
Mechanism for the regulation of the red corpuscle content of the blood. 169
Moorhead, Louis D. Contributions to the physiology of the stomach. 577
Morphin, The response of the surviving uterus to. 529
---, The synergism of, and the scopolamins. 407
--- action, Similarity and synergy of. 385
--- and scopolamin action upon the intact uterus. 547
Newburgh, L. H., and Means, J. H. The bloodflow in a patient with double aortic and double mitral disease. 441
---, and Means, J. H. The effect of caffeine upon the bloodflow in normal human subjects. 449
Nicotin, The vasomotor reaction to, locus of stimulation. 375
Observations on plasmaphaeresis. 129
--- on the effect of intravenous injections of sodium phosphate. 57
Opium alkaloids, Action of the, individually and in combination with each other, on the respiration. 339
Peeler, J. O., and Greene, C. W. The central action of digitalis as tested by the cardio-inhibitory center. 591
Perfusion of isolated organs, Apparatus for the. 467
Phenylethylamin. The action of, on the heart. 511
Physiological test for cholin and some of its applications. 301
Plaint, O. H., and Richards, A. N. Urine formation by the perfused kidney: preliminary experiments on the action of caffeine. 485
Plasmaphaeresis, Observations on. 129
Polycythaemia, The rôle of the liver in acute. 169
Potassium iodid, The absorption of, by perfused thyroid glands and some of the factors modifying it. 557
Ranson, S. Walter, and Hoskins, R. G. The vasomotor reaction to nicotin: locus of stimulation. 375
Rattlesnake serum, The antitoxic action of, on rattlesnake venom. 125
--- venom, The antitoxic action of rattlesnake serum on. 125
Red corpuscle content of the blood, A mechanism for the regulation of the. 169
Respiration, Action of the opium alkaloids, individually and in combination with each other, on the. 339
---, Effect of certain drugs on the. 1
Response of the surviving uterus to morphin and scopolamin. 529
Richards, A. N., and Drinker, Cecil K. An apparatus for the perfusion of isolated organs. 467
---, and Plant, O. H. Urine formation by the perfused kidney: preliminary experiments on the action of caffeine. 485
Rôle of the liver in acute polycythaemia: a mechanism for the regulation of the red corpuscle content of the blood. 169
INDEX

Ross, E. L. and McGuigan, Hugh. The similarity and synergy of morphine and strychnine action ........................................... 385
Salicylates, The influence of, on the elimination of uric acid and other waste products from the blood ........................................... 255
Scopolamin, Action upon the intact uterus, morphin and ......................................... 547
—, The response of the surviving uterus to morphin and ......................... 529
Scopolamins, The synergism of morphin and the ........................................... 407
Scott R. W., and Stewart, G. N. Studies on the circulation in man ......................... 263
Seat of the emetic action of various drugs ........................................... 225
Similarity and synergy of morphine and strychnine action ............................... 385
Smith, Maurice I. The synergism of morphin and the scopolamins ............................. 407
Smooth muscle, Effects of chelidonin on ........................................... 99
Sodium phosphate, Observations on the effect of intravenous injections of ....... 57
Sollmann, Torald, and Pilcher, J. D. Studies on the vasomotor centre: The effects of veratrum viride and cevadin (veratrin) ................. 295
Stewart, G. N. Studies on the circulation in man ........................................... 281
—, and Scott, R. W. Studies on the circulation in man ................................. 263
Stomach, Contributions to the physiology of the ........................................... 377
Strychnine action, Similarity and synergy of morphine and ................................ 385
Studies on the circulation in man ........................................... 263, 281
— on the vasomotor centre ........................................... 295
Synergism of morphin and the scopolamins ........................................... 407
Thyroid glands, The absorption of potassium iodid by perfused, and some of the factors modifying it ........................................... 557
Toxicity of certain hirudin preparations ........................................... 157
Uric acid and other waste products: Influence of salicylates on the elimination of, from the blood ........................................... 255
— and other waste products, Elimination of, from the blood ......................... 601
Urine formation by the perfused kidney ........................................... 485
Vasomotor centre, Studies on the ........................................... 285
— reaction to nicotin: locus of stimulation ........................................... 373
Veratrum viride, On the action of ........................................... 63
— and cevadin (veratrin), The effects of ........................................... 295
Welker, William H., and Marshall, John. The antitoxic action of rattlesnake serum on rattlesnake venom with a note on the percentage of total solids of the serum and bile ........................................... 125
